Chemical Crystallography with Pulsed Neutrons and Synchrotron X-Rays Maria Arménia Carrondo, George A. Jeffrey, 2012-12-06 X ray and neutron crystallography have played an increasingly important role in the chemical and biochemical sciences over the past fifty years The principal obstacles in this methodology the phase problem and computing have been overcome The former by the methods developed in the 1960 s and just recognised by the 1985 Chemistry Nobel Prize award to Karle and Hauptman the latter by the dramatic advances that have taken place in computer technology in the past twenty years Within the last decade two new radiation sources have been added to the crystallographer s tools One is synchrotron X rays and the other is spallation neutrons Both have much more powerful fluxes than the previous sources and they are pulsed rather than continuous New techniques are necessary to fully exploit the intense continuous radiation spectrum and its pulsed property Both radiations are only available from particular National Laboratories on a guest user basis for scientists outside these National Laboratories Hitherto the major emphasis on the use of these facilities has been in solid state physics and the material engineering and biological sciences We believe that there is equivalent potential to applications which are primarily chemical or biochemical

Maximum Entropy and Bayesian Methods John Skilling, 2013-06-29 Cambridge England 1988 *Workshop on Neutron Scattering Data Analysis 1986, Invited and Contributed Papers from the Workshop on Neutron Scattering Data Analysis Held at the Rutherford Appleton Laboratory, Chilton, 13-14 March 1986* M. W. Johnson, 1986 The workshop on Neutron Scattering Data Analysis was held at the Rutherford Appleton Laboratory on 13 14 march 1986 with attendance exceeding expectation In recent years better experimental facilities have improved the collection of neutron scattering data However this has led to problems in analysing the data The purpose of this workshop was to encourage the transfer of techniques between different areas of research where neutron scattering is used The methods covered include quasi elastic and inelastic data analysis small angle scattering data maximum entropy analyses and time of flight neutron scattering other_titles
