Argues that achievement is connected to early child rearing practices *Superhuman Japan* Marie Thorsten, 2012-03-15
This book examines the imaginative narratives that shaped the attitudes of Americans and others toward Japan Focusing on cultural aspects of economic nationalism and US Japan relations during the trade war Marie Thorsten uses examples from public discourse film documentaries novels acts of racism and comparison of international education assessments to examine the way in which Japan has been constituted in a global political gaze as an economic hegemon In times of heightened rivalry we often try to find superior others so that we can motivate ourselves against an imagined future of decline During the Cold War Americans and other nations in the West took advantage of being the underdog against the perceived superiority of the Soviet Union especially by turning the Sputnik launch of 1957 into a lodestone for an educational renaissance As postwar Japanese power became increasingly threatening American policymakers again tried to fashion Japan into another Sputnik to motivate American people This book explores 1980s Bubble Japan as a Superhuman Other in the consciousness of Americans especially as reflected in popular culture and policy discourses Making Japan into a Superhuman often resorted into the same stereotyping that invented Japan as a Subhuman It was difficult for many to see that America Japan and other nations were actually sharing the same global economic circumstances affecting attitudes toward knowledge and nation This book will be of interest to students and scholars of Japanese politics International Relations and Japanese culture and society
