Offering practical case studies to illustrate treatment principles and discussing barriers to treatment and problem solving in relation to common difficulties. Covers topics such as anxiety, attention deficit hyperactivity disorder, sleep, and eating disorders. Therapist competencies are thoroughly examined from the role they play in severe, complex cases and in achieving successful outcomes to commonly misunderstood aspects of family based interventions and how they can be enhanced. Clinical approaches to working with diverse families and those of children affected by parental psychopathology, child maltreatment, and family violence are also explored.
