The readers will come away with a detailed understanding of both conventional and cutting edge approaches. It is a must read for practicing program evaluators, evaluation scholars, and students of evaluation. Stewart I. Donaldson, Claremont Graduate University, brings decades of evaluation and experience to this new edition. He continues his innovative and pragmatic thinking about evaluation, including identifying, constructing, and testing theories that can work in practice. Dr. Chen shows how to blend formative and summative evaluation processes and outcome evaluation theory and action, and much more. R. Burke Johnson, University of South Alabama, Dr. Chen's latest effort offers evaluators a thoughtful expansion on the topics addressed in Practical Program Evaluation 2005 in terms of program theory, logic modeling, and his evaluation typology. New chapters gleaned from the field reveal solution sets for overcoming challenges in a variety of contexts while still balancing scientific and stakeholder needs. This new work provides a solid foundation for the further development of an evaluator's acumen. Gregg M. Gascon, Ohio State University, Chen has the best conceptual framework, and the quality of his writing and analysis are superb.
