Magneto Fluid Dynamics:

An Introduction to Magneto-fluid Mechanics Vincenzo Consolato Antonio Ferraro, Charles Plumpton, 1961

Magneto-Fluid Dynamics Paul Lorrain, Francois Lorrain, Stephane Houle, 2007-10-31 Magnetohydrodynamics MHD concerns the interaction between magnetic fields and conducting fluids We are concerned here with macroscopic interactions and when the conducting fluid is a plasma time scales are very much longer than the plasma period Plasma periods vary widely but are short say 10 second We prefer the term Magneto F i Z i Dynamics MFD because the discipline concerns mostly plasmas various liquid conductors and the liquid part of the Earth's core It seems that the only applications of MFD to water are the induction of electric currents in the oceans by the Earth's magnetic field and ship propulsion But even MFD is not quite appropriate because that term also includes solid conductors that move in magnetic fields This book is meant for graduate and upper division undergraduate students in Physics Geophysics and Astrophysics as well as for practicing scientists in these fields This book is no more than a brief introduction to MFD because this vast subject is closely related to many others namely Astrophysics Electrodynamics Fluid Dynamics Geophysics Oceanography Plasma Physics Thermonuclear Fusion etc We sketch the fundamentals and provide many Examples as well as Case Studies related to natural phenomena MFD sorely needs a rethink it must of course be totally compatible with Physics On the contrary it is the

custom to discuss the shapes of imaginary magnetic field lines without ever referring to the required electric currents **An Introduction to Magneto-fluid Dynamics** Vincenzo Consolato Antonio Ferraro, Charles Plumpton, 1966 **Magneto-fluid dynamics : proceedings of a symposium sponsored by the International Union of Theoretical and Applied Mechanics in coop. with the National Academy of Sciences - National Research Council ; held in Williamsburg, Va. and Washington, D.C., January, 1960** International Union of Theoretical and Applied Mechanics, Williamsburg
