Arnold, 1994 The broadening of interest in parallel computing and transputers is reflected in this text Topics covered include concurrent programming graphics and image processing and robotics and control It is based on the proceedings of the 6th Australian Transputer and Occam User Group Parallel Computing Jonathan P. Gray, Fazel Naghdy, 1995 The broadening of interest in parallel computing and transputers is reflected in this book Topics discussed include concurrent programming graphics and image processing parallel applications robotics and control and software tools The book also features a collection of abstracts of poster presentations **Parallel Computing and Transputer Applications** Mateo Valero, 1992 Mathematics of Computing Parallelism **Past, Present, Parallel** Arthur Trew, Greg Wilson, 2012-12-06 Past Present Parallel is a survey of the current state of the parallel processing industry In the early 1980s parallel computers were generally regarded as academic curiosities whose natural environment was the research laboratory Today parallelism is being used by every major computer manufacturer although in very different ways to produce increasingly powerful and cost effective machines The first chapter introduces the basic concepts of parallel computing the subsequent chapters cover different forms of parallelism including descriptions of vector supercomputers SIMD computers shared memory multiprocessors hypercubes and transputer based machines Each section concentrates on a different manufacturer detailing its history and company profile the machines it currently produces the software environments it supports the market segment it is targeting and its future plans Supplementary chapters describe some of the companies which have been unsuccessful and discuss a number of the common software systems which have been developed to make parallel computers more usable The appendices describe the technologies which underpin parallelism Past Present Parallel is an invaluable reference work providing up to date material for commercial computer users and manufacturers and for researchers and postgraduate students with an interest in parallel computing Transputers and Parallel Applications John Hulskamp, David Jones, 1992-11 Presents the proceedings of a Transputer and OCCAM User Group Conference held in Melbourne in November 1992 discussing recent developments in the field of transputers and parallel applications

Correct Models of Parallel Computing S. Noguchi, Ota Masahiro, 1997 The 21st century will be the age of network computing Among the many key technologies in this field parallel computing and networking technology will play very important roles In this book emphasis is placed on networking and modeling parallel computing The topics cover parallel computing algorithms parallel software massively parallel computing systems and related applications Articles cover parallel computing networking and related applications to initiate discussions Since the appearance of Transputer chip T9000 C104 and standardizations of IEEE1355 Transputer systems seem to have opened a new interesting area of parallel computing networking and many practical applications **Parallel Processing Developments** World Occam and Transputer User Group. Technical Meeting, 1996 Technical articles on the 19th meeting of the World Occam and Transputer User Group

WoTUG They cover a wide range of topics from hardware applications to software tools for of parallel processing support not solely related to transputers Part of the book focusses on the retargeting of the occam compiler to a range of other processors *Transputers and Parallel Architectures* Ugo De Carlini,1991 [Progress in Transputer and Occam Research](#) World Occam and Transputer User Group.
