Next Generation Computing and Information Systems Ankur Gupta,2024-07-04 The proceedings of the 2nd International Conference on Next Generation Computing and Information Systems ICNGCIS 23 includes research papers in diverse emerging domains such as AI blockchain web 3 0 metaverse and edge computing apart from traditional domains such as distributed computing and networks and cybersecurity The proceedings include papers addressing currently relevant research issues such as smart contract security interoperability in the metaverse AI applications in healthcare agriculture and related domains The proceedings encompass findings with real world implications for the growth and evolution of modern computing and information systems by addressing various challenges related to their design deployment operational aspects performance and shortcomings The intended audience for the proceedings of ICNGCIS 23 include researchers from industry and academia practitioners students technology enthusiasts and even general audience looking to explore interesting applications use cases and fundamental issues in modern computing and information systems *Cognitive Engineering for Next Generation Computing* Kolla Bhanu Prakash,G. Deshpande,Rajeev Arya,S.C. Sharma,2020 This book explores advances in next generation computing technologies and systems   Next-generation Computers Edward A. Torrero,1985   NEXT GENERATION COMPUTING - CONVERGENCE OF EDGE AI, 7G/8G NETWORKS, BRAIN COMPUTER INTERFACES S. R. Jena,Dr. Dileep Kumar M.,Dr. Sohit Agarwal,J. V. N. Ramesh,2025-04-02 This book is a comprehensive guide that explores the transformative impact of three cutting edge technologies Edge AI 7G 8G Networks and Brain Computer Interfaces BCIs on the future of computing Next Generation Computing Convergence of Edge AI 7G 8G Networks and Brain Computer Interfaces aims to be a seminal work that not only educates but also inspires its readers to harness the power of driving the convergence of Edge AI 7G 8G Networks and BCIs which collectively promise to revolutionize the computing landscape This convergence will enable unprecedented levels of data processing connectivity and human machine interaction paving the way for innovative applications and solutions However there is a significant knowledge gap in understanding how these technologies interconnect and how they can be leveraged to create new opportunities This book aims to fill that gap by providing a detailed interdisciplinary perspective on the convergence of these technologies   Korea ,2009 This report assesses the current status of Korea s innovation system and policies and identifies where and how the government should focus its efforts to improve the country s innovation capabilities It finds that Korea has one of the highest rates of spending on R D in the world much of which is performed by private firms It also has a highly educated labor force as signaled by its impressive PISA performance and exceptionally high rates of tertiary level graduation with a strong interest in science and technology However a number of bottlenecks persist that hamper Korea s economic convergence with the leading OECD economies These include a relatively weak SME sector and weak performance in services as well as lagging capacities to conduct leading edge research in many areas Furthermore Korea faces numerous threats in the mid term notably increased levels of competition from China and other newly industrializing economies the lowest fertility rate in the OECD and an aging society and a continuing high dependency on imports of natural resources particularly hydrocarbons In the shorter term the economic crisis offers its own challenges with the need for some policy adjustments to deal with expected falls in business investment in R D and growing levels of
