Sign Language Research Theoretical Issues:

Sign Language Research Ceil Lucas,1990 The second international conference on sign language research hosted by Gallaudet University yielded critical findings in vital linguistic disciplines phonology morphology syntax sociolinguistics language acquisition and psycholinguistics Sign Language Research brings together in a fully synthesized volume the work of 24 of the researchers invited to this important gathering Scholars from Belgium to India from Finland to Uganda and from Japan to the United States exchanged the latest developments in sign language research worldwide Now the results of their findings are in this comprehensive volume complete with illustrations and photographs

Theoretical Issues in Sign Language Research, Volume 1 Susan D. Fischer,Patricia Siple,1990-11-19 Only recently has linguistic research recognized sign languages as legitimate human languages with properties analogous to those cataloged for French or Navajo for example There are many different sign languages which can be analyzed on a variety of levels phonetics phonology morphology syntax and semantics in the same way as spoken languages Yet the recognition that not all of the principles established for spoken languages hold for sign languages has made sign languages a crucial testing ground for linguistic theory Edited by Susan Fischer and Patricia Siple this collection is divided into four sections reflecting the traditional core areas of phonology morphology syntax and semantics Although most of the contributions consider American Sign Language ASL five treat sign languages unrelated to ASL offering valuable perspectives on sign universals Since some of these languages or systems are only recently established they provide a window onto the evolution and growth of sign languages

Theoretical Issues in Sign Language Research, Volume 2 Susan D. Fischer,Patricia Siple,1991-06-25 The recent recognition of sign languages as legitimate human languages has opened up new and unique ways for both theoretical and applied psycholinguistics and language acquisition have begun to demonstrate the universality of language acquisition comprehension and production processes across a wide variety of modes of communication As a result many language practitioners teachers and clinicians have begun to examine the role of sign language in the education of the deaf as well as in language intervention for atypical language delayed populations This collection edited by Patricia Siple and Susan D Fischer brings together theoretically important contributions from both basic research and applied settings The studies include native sign language acquisition acquisition and processing of sign language through a single mode under widely varying conditions acquisition and processing of bimodal speech and sign input and the use of sign language with atypical autistic and mentally retarded groups All the chapters in this collection of state of the art research address one or more issues related to universality of language processes language plasticity and the relative contributions of biology and input to language acquisition and use

Sociolinguistics in Deaf Communities Ceil Lucas,1995 A valuable

resource and a rare qualitative presentation Academic Library Book Review **Sign Language Research**, 1990 **The Routledge Handbook of Theoretical and Experimental Sign Language Research** Josep Quer, Roland Pfau, Annika Herrmann, 2021-03-11 The Routledge Handbook of Theoretical and Experimental Sign Language Research bridges the divide between theoretical and experimental approaches to provide an up to date survey of key topics in sign language research With 29 chapters written by leading and emerging scholars from around the world this Handbook covers the following key areas On the theoretical side all crucial aspects of sign language grammar studied within formal frameworks such as Generative Grammar On the experimental side theoretical accounts are supplemented by experimental evidence gained in psycho and neurolinguistic studies On the descriptive side the main phenomena addressed in the reviewed scholarship are summarized in a way that is accessible to readers without previous knowledge of sign languages Each chapter features an introduction an overview of existing research and a critical assessment of hypotheses and findings The Routledge Handbook of Theoretical and Experimental Sign Language Research is key reading for all advanced students and researchers working at the intersection of sign language research linguistics psycholinguistics and neurolinguistics Chapters 5 18 and 19 of this book are freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4 0 license **Theoretical Issues in Sign Language Research II** Gallaudet University. Department of Linguistics and Interpreting, 1988 *Perspectives on Classifier Constructions in Sign Languages* Karen Emmorey, 2003-04-02 This text is the result of work discussed and presented at the Workshop on Classifier Constructions It aims to bring to light issues related to the study of classifier constructions and to present contemporary linguistic and psycholinguistic analyses of these constructions **Theoretical Issues in Sign Language Research 9** International Conference on Theoretical Issues in Sign Language Research, 2006 **The Syntax of American Sign Language** Carol Jan Neidle, 2000 Recent research on the syntax of signed language has revealed that apart from some modality specific differences signed languages are organized according to the same underlying principles as spoken languages This book addresses the organization and distribution of functional categories in American Sign Language ASL focusing on tense agreement and wh constructions **Language, Gesture, and Space** Karen Emmorey, Judy S. Reilly, 2013-06-17 This book brings together papers which address a range of issues regarding the nature and structure of sign languages and other gestural systems and how they exploit the space in which they are conveyed The chapters focus on five pertinent areas reflecting different but related research topics space in language and gesture point of view and referential shift morphosyntax of verbs in ASL gestural systems and sign language and language acquisition and gesture Sign languages and gestural systems are produced in physical space they manipulate spatial contrasts for linguistic and communicative purposes In addition to exploring the different functions of space researchers discuss similarities and differences between visual gestural systems established sign languages pidgin sign language International Sign homesign

systems developed by deaf children with no sign language input novel gesture systems invented by hearing nonsigners and the gesticulation that accompanies speech The development of gesture and sign language in children is also examined in both hearing and deaf children charting the emergence of gesture manual babbling its use as a prelinguistic communicative device and its transformation into language like systems in homesigners Finally theoretical linguistic accounts of the structure of sign languages are provided in chapters dealing with the analysis of referential shift the structure of narrative the analysis of tense and the structure of the verb phrase in American Sign Language Taken together the chapters in this volume present a comprehensive picture of sign language and gesture research from a group of international scholars who investigate a range of communicative systems from formal sign languages to the gesticulation that accompanies speech

Sign Language Research, Uses and Practices Laurence Meurant, Aurélie Sinte, Mieke Van Herreweghe, Myriam Vermeerbergen, 2013-06-26 The uses and practices of sign languages are strongly related to scientific research on sign languages and vice versa Conversely sign linguistics cannot be separated from Deaf community practices including practices in education and interpretation Therefore the current volume brings together work on sign language interpreting the use of spoken and sign language with deaf children with cochlear implants and early language development in children exposed to both a spoken and sign language and reports on recent research on aspects of sign language structure It also includes papers addressing methodological issues in sign language research The book presents papers by more seasoned researchers and new kids on the block as well as papers in which the two collaborate The contributions will be of interest to all those interested in linguistics sociolinguistics cultural studies interpreting and education It will have particular relevance to those interested in sign linguistics sociolinguistics of deaf communities Deaf studies Deaf culture sign language interpretation sign language teaching and spoken signed bilingualism Given the scarcity of literature on Deaf studies the book will also appeal widely beyond the traditional academic milieu As a result it has relevance for those teaching and learning sign languages for professional and student interpreters and for teachers of the deaf *Sign Language in Indo-Pakistan* Ulrike

Zeshan, 2000-08-15 To find a suitable framework for the description of a previously undocumented language is all the more challenging in the case of a signed language In this book for the first time an indigenous Asian sign language used in deaf communities in India and Pakistan is described on all linguistically relevant levels This grammatical sketch aims at providing a concise yet comprehensive picture of the language It covers a substantial part of Indopakistani Sign Language grammar Topics discussed range from properties of individual signs to principles of discourse organization Important aspects of morphological structure and syntactic regularities are summarized Finally sign language specific grammatical mechanisms such as spatially realized syntax and the use of facial expressions also figure prominently in this book A 300 word dictionary with graphic representations of signs and a transcribed sample text complement the grammatical description The cross linguistic study of signed languages is only just beginning Descriptive materials such as the ones presented in this book

provide the necessary starting point for further empirical and theoretical research in this direction **Sign Language Research, Uses and Practices** Laurence Meurant, Aurélie Sinte, Mieke Van Herreweghe, Myriam Vermeerbergen, 2013-06-26 Sign linguistics cannot be separated from deaf community practices especially with regard to education and interpretation This book brings together work on sign language interpreting the use of spoken and sign language with CI children and early language development in children exposed to both a spoken and sign language In addition it includes papers addressing aspects of sign language structure and methodological issues in sign language research This book has relevance for those teaching and learning sign languages for professional and student interpreters and for teachers of the deaf *Proceedings of the ... Annual High Desert Linguistics Society Conference* High Desert Linguistics Society. Conference, 2002 **International Bibliography of Sign Language** Guido H. G. Joachim, Siegmund Prillwitz, 1993 In dual English and German texts this comprehensive reference presents bibliographical information for all publications on sign language before 1993 including articles videotapes and available unpublished papers and articles Listed alphabetically the entries have been arranged in 14 topical categories for easiest use *Sign Language Studies*, 1990
