Reduction And Resolution Computation And Logic:

Computational Logic: Logic Programming and Beyond Antonis C. Kakas, Robert Kowalski, 2002-07-12 This volume spans the whole field of computational logic seen from the point of view of logic programming The topics addressed range from issues concerning the development of programming languages in logic and the application of computational logic to real life problems to philosophical studies of the field at the other end of the spectrum The articles presented cover the contributions of computational logic to databases and artificial intelligence with particular emphasis on automated reasoning reasoning about actions and change natural languages and learning Together with its companion volume LNAI 2407 this book commemorates the 60th birthday of Bob Kowalski as one of the founders of and contributors to computational logic

Programming Logics Andrei Voronkov, Christoph Weidenbach, 2013-04-05 This Festschrift volume published in memory of Harald Ganzinger contains 17 papers from colleagues all over the world and covers all the fields to which Harald Ganzinger dedicated his work during his academic career The volume begins with a complete account of Harald Ganzinger s work and then turns its focus to the research of his former colleagues students and friends who pay tribute to him through their writing Their individual papers span a broad range of topics including programming language semantics analysis and verification first order and higher order theorem proving unification theory non classical logics reasoning modulo theories and applications of automated reasoning in biology

Computational Logic and Human Thinking Robert Kowalski, 2011-07-21 The practical benefits of computational logic need not be limited to mathematics and computing As this book shows ordinary people in their everyday lives can profit from the recent advances that have been developed for artificial intelligence The book draws upon related developments in various fields from philosophy to psychology and law It pays special attention to the integration of logic with decision theory and the use of logic to improve the clarity and coherence of communication in natural languages such as English This book is essential reading for teachers and researchers who may be out of touch with the latest developments in computational logic It will also be useful in any undergraduate course that teaches practical thinking problem solving or communication skills Its informal presentation makes the book accessible to readers from any background but optional more formal chapters are also included for those who are more technically oriented

Readings in Artificial Intelligence Bonnie Lynn Webber, Nils J. Nilsson, 2014-05-12 Readings in Artificial Intelligence focuses on the principles methodologies advancements and approaches involved in artificial intelligence The selection first elaborates on representations of problems of reasoning about actions a problem similarity approach to devising heuristics and optimal search strategies for speech understanding control Discussions focus on comparison with existing speech understanding systems empirical comparisons of the different strategies analysis of distance function approximation problem similarity problems of reasoning about action search for solution in the reduction system and relationship between the initial search space and the higher level search space The book then examines consistency in networks of relations non

resolution theorem proving using rewriting rules for connection graphs to prove theorems and closed world data bases The manuscript tackles a truth maintenance system elements of a plan based theory of speech acts and reasoning about knowledge and action Topics include problems in reasoning about knowledge integration knowledge and action models of plans compositional adequacy truth maintenance mechanisms dialectical arguments and assumptions and the problem of control The selection is a valuable reference for researchers wanting to explore the field of artificial intelligence

Partial Evaluation and Mixed Computation Dines Bjørner, Andrei Petrovich Ershov, Neil D. Jones, 1988 The aim of Partial Evaluation and Mixed Computation is to construct when given a program and some form of restriction on its usage e.g. knowledge of some but not all of its input parameter values a more efficient new or residual program that is equivalent to the original program when used according to the restriction Compiling and compiler generation are just two of the many applications It is thus a form of program transformation but with more emphasis on purely automatic methods than traditional program transformation This volume collects a variety of examples of current work in the field The papers demonstrate the vitality of this emerging area with contributions covering many different aspects such as programming languages application areas degrees of automation degrees of formality and technical methods
