targets [The Future of Cancer Surveillance Research](#) Philip Rosenberg ,Jonas Almeida,2026-02-06 Cancer Surveillance Research CSR is an observational science of cancer data ascertained in population based cohorts notably cancer registries CSR is used to track cancer incidence mortality burden prevalence and survivorship quantify cancer differences inform cancer control programs test hypotheses uncover etiologic clues gauge effectiveness of screening and therapy and characterize cancer s natural history and its evolution over time To date most CSR studies have relied on a limited set of non parametric statistical tools applied to relatively small datasets Currently attempts to scale such studies are surprisingly labor intensive and require specialized expertise Advances in biostatistics and data science have the potential to usher in a golden age where more data and better data are universally accessible contemporary methods from biostatistics and data science are rapidly and freely deployable and current knowledge more readily mined to inform both cancer control and cancer research The aim of this research topic is to show how to get there the golden age from the here and now There are three pieces to the equation for advancement data statistics and hypotheses 1 How can information technology and data science facilitate access to and integration of public use cancer data in a format suitable for novel studies of cancer incidence mortality and survivorship How can associated demographic and risk factors data be integrated with cancer surveillance data into the workflows 2 Can advances in non parametric statistics and mathematical models especially age period cohort models provide a unified framework for descriptive and hypothesis based analysis of cancer trends and patterns 3 How can information technology and data science help researchers interrogate synthesize and statistically analyze cancer data to inform etiological hypotheses and cancer control programs As well we aim to highlight why this effort is important 4 What are the big questions in CSR Which current trends and patterns are most concerning How is cancer evolving within and between countries and populations stratified by factors including human development indices race ethnicity ancestry sex age location and risk factor profiles 1 Cancer epidemiology data science and integrative studies in CSR a From APIs to analytical files b Record linkage tools and resources c Web based analysis tools d AI prompt engineering and web library applied to CSR 2 Non parametric statistics and mathematical models in CSR a Spatial and temporal analysis of cancer outcomes and risk factors b Scalable alternatives to the Join Point method c Comparative methods and hypothesis testing d Advances in age period cohort analysis e Forecasting models 3 Knowledge Mining in CSR a Generative languages examples promises and pitfalls b Advances in meta analysis 4 Novel methods in surveys of current and future cancer trends a Slowing or growing Cancer incidence mortality and survival within and between populations worldwide b The many faces of breast neoplasms trends by subtype and behavior c Racial and ethnic cancer disparities d Epidemiology of early onset cancers Original contributions reviews reviews meta analyses and tutorials are welcome Please note manuscripts consisting solely of bioinformatics computational analysis or predictions which are not accompanied by illustrative real world examples are not suitable for publication in this special issue Ideally all data should be freely available *Food, Nutrition, and Diets at Net*

Zero. 10 years of Frontiers in Nutrition Johannes le Coutre, 2025-05-23 Over the second half of the 20th century many questions relating to food and nutrition science were considered to be nearly understood and beyond ensuring the balanced delivery of proteins carbohydrates and fats no major discoveries were anticipated in this scientific field Much of the technological advancements in the field were focused on food production and procurement at scale Now about half a century later the domain of food and nutrition science technology is experiencing a renaissance unlike any other We are not only discussing food and public health using narratives ranging from functional to superfoods but we are also engaging in conversations about planetary health and the role of foods as medicine among other topics Furthermore we are beginning to realize the intricate interplay between food systems and our global climate Our methods of procuring nutrition contribute to climate change and we are witnessing a significant increase in climate driven events that threaten our food security Ten years ago in collaboration with the team at Frontiers we founded Frontiers in Nutrition to provide a rigorous science based platform for the open access publication and exchange of findings within a fully integrated scope of discussing food and nutrition With this Research Topic we welcome the world s foremost influential and leading scientists to join us in celebrating our 10th anniversary and to contribute bold and visionary articles
