Pseudofunctors On Modules With Zero Dimensional Support:

Pseudofunctors on Modules with Zero Dimensional Support I-Chiau Huang, 1995 Pseudofunctors with values on modules with zero dimensional support are constructed over the formally smooth category and residually finite category Combining those pseudofunctors a pseudofunctor over the category whose objects are Noetherian local rings and whose morphisms are local with finitely generated residue field extensions is constructed

Classification of Direct Limits of Even Cuntz-Circle Algebras Huaxin Lin, Norman Christopher Phillips, 1995 We prove a classification theorem for purely infinite C algebras that is strong enough to show that the tensor products of two different irrational rotation algebras with the same even Cuntz algebra are isomorphic

The Index Theorem for Minimal Surfaces of Higher Genus Friedrich Tomi, Anthony Tromba, 1995 In this paper we formulate and prove an index theorem for minimal surfaces of higher topological type spanning one boundary contour Our techniques carry over to surfaces with several boundary contours as well as to unoriented surfaces

Triangular Algebras and Ideals of Nest Algebras John Lindsay Orr, 1995 Immersive environments such as virtual reality technology makes possible can respond to their audiences so that each person's experience of the environment is unique This volume brings together 11 essays along with artists projects produced at the Banff Centre for the Arts in Canada to explore issues raised by the creation of virtual environments The essays approach the social and cultural implications of cyberspace from the perspective of cultural studies communications art history art criticism English and women's studies while artists who created nine virtual worlds at the Banff Centre discuss what they have tried to accomplish in both theoretical and technical terms With 64 illustrations including 18 color plates Annotation copyright by Book News Inc Portland OR

Two-Generator Discrete Subgroups of $\text{PSL}(2, \mathbb{R})$ Jane Gilman, 1995 The discreteness problem is the problem of determining whether or not a two generator subgroup of $\text{PSL}(2, \mathbb{R})$ is discrete Historically papers on this old and subtle problem have been known for their errors and omissions This book presents the first complete geometric solution to the discreteness problem by building upon cases previously presented by Gilman and Maskit and by developing a theory of triangle group shinglings tilings of the hyperbolic plane and a theory explaining why the solution must take the form of an algorithm This work is a thoroughly readable exposition that captures the beauty of the interplay between the algebra and the geometry of the solution

Variance and Duality for Cousin Complexes on Formal Schemes Joseph Lipman, Suresh Nayak, Pramathanath Sastry, 2005 Robert Hartshorne's book Residues and Duality 1966 Springer Verlag introduced the notion of residual complexes and developed a duality theory Grothendieck duality on the category of maps of noetherian schemes The three articles in this volume constitute a reworking of the main parts of the corresponding chapters in Hartshorne's 1966 book in greater generality using a somewhat different approach In particular throughout this volume the authors work with arbitrary quasi coherent torsion Cousin complexes on formal schemes not only with residual complexes on ordinary schemes Additionally their motivation is to help readers gain a better understanding of the relation between local

properties of residues and global properties of the dualizing pseudofunctor The book is suitable for graduate students and researchers working in algebraic geometry Stratifying Endomorphism Algebras Edward Cline, Brian Parshall, Leonard L. Scott, 1996 This paper presents a systematic study of the relationships between the representation theories of italic capital R and italic capital A especially those involving actual or potential quasi hereditary structures on the latter algebra Our original motivation comes from the theory of Schur algebras work of Soergel on the Bernstein Gelfand Gelfand category script capital O and recent results of Dlab Heath Marko realizing certain endomorphism algebras as quasi hereditary algebras We synthesize common features of all these examples and go beyond them in a number of new directions *Completely Positive Hypergroup Actions* Ajit Iqbal Singh, 1996 It is now well known that the measure algebra script capital M italic capital G of a locally compact group can be regarded as a subalgebra of the operator algebra italic capital B italic capital B italic capital L2 italic capital G of the operator algebra italic capital B italic capital L2 italic capital G of the Hilbert space italic capital L2 italic capital G We study the situation in hypergroups and find that in general the analogous map for them is neither an isometry nor a homomorphism However it is completely positive and completely bounded in certain ways This work presents the related general theory and special examples **Degenerate Principal Series for Symplectic and Odd-Orthogonal Groups** Chris Jantzen, 1996-01-01 This memoir studies reducibility in a certain class of induced representations for and where is adic In particular it is concerned with representations obtained by inducing a one dimensional representation from a maximal parabolic subgroup i e degenerate principal series representations Using the Jacquet module techniques of Tadi the reducibility points for such representations are determined When reducible the composition series is described giving Langlands data and Jacquet modules for the irreducible composition factors ,2007 **Mathematical Reviews** ,2006 Notices of the American Mathematical Society American Mathematical Society, 1993 *The Cumulative Book Index* ,1996 A world list of books in the English language **Dissertation Abstracts International** ,1993-03 **American Doctoral Dissertations** ,1992 *American Book Publishing Record* ,1995 **International mathematical news** ,1996 Whitaker's Books in Print ,1998 Notes wydawniczy ,1995 Books in Print ,1991
