Reading and Learning to Read Jo Anne L. Vacca, 2003. In this text, some of the core beliefs about reading and learning to read include the following: children use language to seek and construct meaning from what they read, hear, and view; reading, writing, speaking, listening, and viewing are interrelated and mutually supporting as children learn and use them; learning to read involves learning how to decode words quickly and accurately; children learn to read as they read to learn, enjoy, communicate, and solve problems; children need to be exposed to a broad spectrum of reading materials and literature, including electronic texts; children develop skills and strategies through explicit instruction and purposeful, meaningful use; children deserve assessment techniques and processes that mirror the authentic ways they demonstrate their continually developing literacy; children benefit from classroom communities in which materials, curriculum, instruction, practice, and assessment celebrate their diverse constitutions; teachers, parents, and administrators should make decisions based on how children learn and how they can best be taught. The text continues to emphasize a contemporary, balanced approach to teaching reading and writing with a renewed emphasis on integrating technology, accommodating the needs of diverse learners, developing early and beginning
