Differential equations play a vital role in the fields of engineering and science Problems in engineering and science can be modeled using ordinary or partial differential equations Analytical solutions of differential equations may not be obtained easily so numerical methods have been developed to handle them Machine intelligence methods such as Artificial Neural Networks ANN are being used to solve differential equations and these methods are presented in Artificial Neural Networks for Engineers and Scientists Solving Ordinary Differential Equations This book shows how computation of differential equation becomes faster once the ANN model is properly developed and applied

*Introduction to Simulink with Engineering Applications* Steven T. Karris, 2006 This text is an introduction to Simulink a companion application to MATLAB It is written for students at the undergraduate and graduate programs as well as for the working professional Although some previous knowledge of MATLAB would be helpful it is not absolutely necessary Appendix A of this text is an Introduction to MATLAB to enable the reader to begin learning both MATLAB and Simulink to perform graphical computations and programming Chapters 2 through 18 describe the blocks of all Simulink libraries Their application is illustrated with practical examples through Simulink models some of which are supplemented with MATLAB functions commands and
