Pathophysiology Of The Nervous System:

Pathophysiology of the Nervous System Lewis Sudarsky,1990 **Central Nervous System Pathology** G.N. Kryzhanovsky,2012-12-06 One hardly always receives due credit for working out a general theory It is more enticing to be successful in discovering new phenomena of tangible facts even if they are particular ones The great technical opportunities which now exist and the new methods of investigation which recently seemed to be fantastic have made that even more enticing Therefore the establishment of general regularities seems to be an abstract occupation whose significance is not always clear Nevertheless a general theory should be elaborated Factual material should be systematized and generalized as it accumulates As an increasing amount of data is obtained it becomes increasingly urgent to ascertain the general regularities which determine the typical mechanisms of individual phenomena Researchers approach these aspects of scientific activity in different ways Some of them are interested in analyzing the specifics of a phenomenon while others try to find a general regularity in an individual fact and look for its confirmation in new material Both of these indispensable forms of research have been reflected in this book
