Structured and Object-Oriented Problem Solving Using C++

Staugaard,2003-08-14 **Structured and Object-oriented Problem Solving Using C++** Andrew C. Staugaard,2002 Welcome to the third edition of my C text The highly successful first edition was one of the first textbooks available for teaching C in the first programming course The text was introduced at the 1994 ACM Conference in Phoenix when many were arguing the virtues of teaching C and OOP versus Pascal and structured programming in the first programming course I argued at the time and still argue that students need to be taught problem solving early on using both the structured and object oriented paradigms and because of its hybrid nature C is the only language suited to learning both of these paradigms Since then many institutions have made the switch from Pascal to C for just this reason as well as the intense industry support for C language As a result this third edition continues to provide an introduction to both structured and object oriented problem solving techniques using the C language Of course many improvements have been made based on using the text in numerous classrooms all over the world since 1994 As with earlier editions the text starts from the beginning assuming no previous knowledge of C or any other programming language This text is appropriate for any introductory programming CS1 course using the C language as well as experienced programmers wanting an introduction to structured and object oriented problem solving techniques using the C language Book Preface Journal of Object-oriented Programming ,2001 **Subject Guide to Books in Print** ,2001 Object-Oriented Multithreading Using C++ Cameron Hughes,Tracey Hughes,1997-09-11 A developer s guide to writing thread safe object oriented applications Drawing on years of programming experience Cameron and Tracey Hughes provide a building block approach to developing multithreaded applications in C This book offers programmers the first comprehensive explanation of multithreading techniques and principles for objects and class libraries It teaches C programmers everything they ll need to build applications that

cooperate for system resources instead of competing This invaluable reference shows you how to avoid common pitfalls of multithreading whether you re programming in UNIX Windows NT or OS 2 environment All major examples are implemented in each environment and supported by thorough explanations of object oriented multithread architecture and incremental multithreading On the disk you ll find All the source code contained in the book Important protocols and information resources A variety of multithreaded components ready to build into your own applications or class library You ll find a wealth of coverage on highly practical but little understood topics like Thread safe container classes POSIX threads and the new thread standard 1003 1c STL algorithms and containers in multithread environments C synchronization components Object oriented mutexes and semaphores Avoiding deadlock and data race through encapsulation Multithreaded application frameworks Object oriented pipe streams Visit our Web site at www.wiley.com/compbooks **The C++ Report** ,1995

Staugaard,1996 The new edition of this introductory programming text continues to emphasize problem solving techniques using the C language Coverage develops strong problem solving skills using problem abstraction and stepwise refinement through the Programmer s Algorithm The author first emphasizes the structured procedural paradigm then gradually advances to the object oriented paradigm Traditional data types are presented as classes early with constants and variables treated as objects of those classes The author s approach prepares students for in depth coverage of classes and objects presented later in the text while building essential structured programming concepts This edition now integrates problem solving through 19 Problem Solving in Action case studies and offers early treatment of reading writing C files for program I O **C/C++ Users Journal** ,2000 *Books in Print Supplement* ,2002 **C++** Larry R.
