B. Kumar, B. H. V. Topping

Proc 1994 Convention Structural Engineer:

Dynamics With Friction: Modeling, Analysis And Experiment (Part I) Ardeshir Guran, Friedrich Pfeiffer, Karl Popp, 1996-08-23 The dynamics of dissipative mechanical and structural systems is being investigated at various institutions and laboratories worldwide with ever increasing sophistication of modeling analysis and experiments This book offers a collection of contributions from these research centers that represent the state of the art in the study of friction oscillators It provides the reader with the fruits of a team effort by leaders in this fascinating field The topics covered include friction modeling self excited friction oscillators homogeneous frictional systems unsteady lubricated friction instantaneous contact geometry impact damping friction induced instability and nonlinear dynamics of stick slip systems among other topics This book gives a comprehensive picture of dynamics of dissipative mechanical and structural systems It also gives an up to date account of the present state of the field It will be of interest to engineers rheologists material scientists applied mathematicians physicists and historians of science and technology

Structural Engineering, Mechanics and Computation A. Zingoni, 2001-03-16 Following on from the International Conference on Structural Engineering Mechanics and Computation held in Cape Town in April 2001 this book contains the Proceedings in two volumes There are over 170 papers written by Authors from around 40 countries worldwide The contributions include 6 Keynote Papers and 12 Special Invited Papers In line with the aims of the SEMC 2001 International Conference and as may be seen from the List of Contents the papers cover a wide range of topics under a variety of themes There is a healthy balance between papers of a theoretical nature concerned with various aspects of structural mechanics and computational issues and those of a more practical nature addressing issues of design safety and construction As the contributions in these Proceedings show new and more efficient methods of structural analysis and numerical computation are being explored all the time while exciting structural materials such as glass have recently come onto the scene Research interest in the repair and rehabilitation of existing infrastructure continues to grow particularly in Europe and North America while the challenges to protect human life and property against the effects of fire earthquakes and other hazards are being addressed through the development of more appropriate design methods for buildings bridges and other engineering structures

Mechanics of Structures and Materials M.A. Bradford, R.Q. Bridge, S.J. Foster, 2026-02-02 Structural mechanics in Australasia is the focus of the some 100 papers but among them are also contributions from North America Japan Britain Asia and southeast Asia
