Repression Of Heresy In Medieval Germany:

Repression of Heresy in Medieval Germany Richard Kieckhefer, 1979 This book is a volume in the Penn Press Anniversary Collection To mark its 125th anniversary in 2015 the University of Pennsylvania Press rereleased more than 1 100 titles from Penn Press s distinguished backlist from 1899 1999 that had fallen out of print Spanning an entire century the Anniversary Collection offers peer reviewed scholarship in a wide range of subject areas Current Trends in the Historiography of Inquisitions Autori Vari, 2024-03-28T10:04:00+01:00 This volume launches the book series of Inquire International Centre for Research on Inquisitions of the University of Bologna a research network that engages with the history of religious justice from the 13th to the 20th century This first publication offers twenty chapters that take stock of the current historiography on medieval and early modern Inquisitions the Spanish Portuguese and Roman Inquisitions and their modern continuations Through the analysis of specific questions related to religious repression in Europe and the Iberian colonial territories extending from the Middle Ages to today the contributions here examine the history of the perception of tribunals and the most recent historiographical trends New research perspectives thus emerge on a subject that continues to intrigue those interested in the practices of justice and censorship the history of religious dissent and the genesis of intolerance in the Western world and beyond *Inquisition and Knowledge, 1200-1700* Peter Biller, L. J. Sackville, 2022 Essays considering how information could be used and abused in the service of heresy and inquisition The collection curation and manipulation of knowledge were fundamental to the operation of inquisition Its coercive power rested on its ability to control information and to produce authoritative discourses from it a fact not lost on contemporaries or on later commentators Understanding that relationship between inquisition and knowledge has been one of the principal drivers of its long historiography Inquisitors and their historians have always been preoccupied with the process by which information was gathered and recirculated as knowledge The tenor of that question has changed over time but we are still asking how knowledge was made and handed down to them and to us and how their sense of what was interesting or useful affected their selection This volume approaches the theme by looking at heresy and inquisition in the Middle Ages and also at how they were seen in the sixteenth and seventeenth centuries The contributors consider a wide range of medieval texts including papal bulls sermons polemical treatises and records of interrogations both increasing our knowledge of medieval heresy and inquisition and at the same time delineating the twisting of knowledge This polarity continues in the early modern period when scholars appeared to advance learning by hunting for medieval manuscripts and publishing them or ensuring their preservation through copying them but at the same time as some of the chapters here show these were proof texts in the service of Catholic or Protestant polemic As a whole the collection provides a clear view of and invites readers reflection on the shading of truth and untruth in medieval and early modern knowledge of heresy and inquisition Contributors Jessalynn Lea Bird Harald Bollbuck Irene Bueno J rg Feuchter Richard Kieckhefer Pawel Kras Adam Poznanski Luc Racaut Alessandro Sala

Glenn Hinson,1995 *The Papal Monarchy* Colin Morris,1989-05-18 The two centuries covered in this volume were among the most creative in the history of the Church Colin Morris charts the emergence of much that is considered characteristic of European culture and religion including universities and commercial cities the crusades the friars chivalry marriage and church architecture In all these developments the Roman Church played an important and often fundamental role A re evaluation of that role is now particularly apt given the dissolution of Christendom in its old form witnessed by today s generation *Peacemaking in Medieval Europe* Udo Heyn,1997 Summarizes a number of essays published or delivered during the 1980s and 1990s investigating the reasons for conflict in the Middle Ages and the mechanisms by which it was contained The purpose is to elucidate approaches that could be of use in the modern world Among the topics are peace campaigns of the church and the state the movement from private justice to public law and from private combat to rules of war alternatives to the peace campaigns and the pacification of Europe Over 100 pages are devoted to annotated bibliographic material of interest both to medievalists and peace scholars Paper edition unseen 13 95 Annotation copyrighted by Book News Inc Portland OR

Plenitude of Power Robert C. Figueira,2016-04-22 I study power so Robert Louis Benson described his work as a scholar of medieval history This volume unites papers by a number of his students dealing with matters central to Benson s historical interests ecclesiastical institutions and administration emperorship and papacy canon law political ideology and historiography The justification and exercise of political power is considered in two chapters that look at how the hagiography of a late Roman military saint Maurice was harnessed in the 11th century to the discussion of the power exercised by both emperor and pope and how both pious purpose and political pretext animated the Hohenstaufen emperors suppression of heresy Three subsequent chapters focus on the Church a study of the legal commentaries that taught that the authority to bind and loose in a specific ecclesiastical matter could be determined by the opinions of the elders of the province an argument that Innocent III s administration of the Roman church represented a model for the ordering of all Christian society and an inquiry into the doctrinal formation of the territorial principle in the exercise of jurisdiction by papal legates The late Middle Ages provides the focus for two additional studies namely an exploration of the issues of power and authority in the charitable institutions of Cologne in the 13th 14th centuries and the argument that the current desire for universal standards of governmental conduct in the area of basic human rights hearkens back to natural law theory as outlined in the 15th century by Nicholas of Cusa Two historiographical studies round out the volume an estimation of modern research regarding the political theology of late antiquity and a reflection on Benson s own contribution to historical scholarship Together these papers both epitomize and further develop Benson s distinctive approach to the study of the Middle Ages while themselves making their own important contribution **The Fall of the Prison** Lee Griffith,1999-01-25 Even as America s prison system is expanding at an unprecedented rate Lee Griffith makes a startling proposal in this book

Cameron, 2022-06-27 The medieval dissenters known as Waldenses named after their first founder Valdes of Lyons have long attracted careful scholarly study especially from specialists writing in Italian French and German Waldenses were found across continental Europe from Aragon to the Baltic and East Central Europe They were long lived resilient and diverse They lived in a special relationship with the prevailing Catholic culture making use of the Church's services but challenging its claims Many Waldenses are known mostly or only because of the punitive measures taken by inquisitors and the Church hierarchy against them This volume brings for the first time a wide ranging multi authored interpretation of the medieval Waldenses to an English language readership across Europe and over the four centuries until the Reformation Contributors Marina Benedetti Peter Biller Luciana Borghi Cedrini Euan Cameron Jacques Chiffolleau Albert de Lange Andrea Giraudo Franck Mercier Grado Giovanni Merlo Georg Modestin Martine Ostorero Damian J Smith Claire Taylor and Kathrin Utz Tremp [Heresy and Citizenship](#) Eugene Smelyansky, 2020-09-27 Heresy and Citizenship examines the anti heretical campaigns in late medieval Augsburg Rothenburg ob der Tauber Strasbourg and other cities By focusing on the

unprecedented period of persecution between 1390 and 1404 this study demonstrates how heretical presence in cities was exploited in ecclesiastical political and social conflicts between the cities and their external rivals and between urban elites These anti heretical campaigns targeted Waldensians who believed in lay preaching and simplified forms of Christian worship Groups of individuals identified as Waldensians underwent public penance execution or expulsion In each case the course and outcome of inquisitions reveal tensions between institutions within each city most often between city councils and local bishops or archbishops In such cases competing sides used the persecution of heresy to assert their authority over others As a result persecution of urban Waldensians acquired meaning beyond mere correction of religious error By placing the anti heretical campaigns of this period in their socio political and religious context Heresy and Citizenship also engages with studies of social and political conflict in late medieval towns It examines the role the exclusion of religiously and socially deviant groups played in the development of urban governments and the rise of ideologies of good citizenship and the common good It will be of interest to scholars and students interested in medieval urban and religious history and the history of heresy and its persecution **Medieval Heresy & the Inquisition** Arthur Stanley Turberville, 1920 **Bulletin of**
