Russia in the Time of Cholera John P. Davis, 2018-03-09 As the nineteenth century drew to a close and epidemics in western Europe were waning the deadly cholera vibrio continued to wreak havoc in Russia outlasting the Romanovs Scholars have since argued that cholera eventually fell prey to better sanitation and strict quarantine under the Soviets citing as evidence imperial mismanagement a backward tsarist medical system and physicians anachronistic environmental interpretations of the disease Drawing on extensive archival research and the so called material turn in historiography however John P Davis here demonstrates that Romanov era physicians environmental approach to disease was not ill grounded nor a consequence of neo liberal or populist political leanings but born of pragmatic scientific considerations The physicians confronted cholera in a broad and sophisticated way essentially laying the foundations for the system of public health that the Soviets successfully used to defeat cholera during the New Economic Policy 1922 1928 By focusing for the first time on the conclusion of the cholera epoch in Russia Davis adds an indispensable layer of nuance to the existing conception of Romanov Russia and its complicated legacy in the Soviet period

Traditional methods of studying the past have always given greater importance to nationalist religious and moral interests which subordinated the historical fact to the System point of view That s how we have been educated The time has come to simplify and show respect for our ancestors striving to know what really happened in the past and not just what they want to inform us about After so many years of studying History I came to the conclusion that the best study system is through an impartial objective Chronology that just put each event in its exact place in time revealing History without manipulation This Chronology contains not only purely political facts such as the foundation of cities the birth of kingdoms and empires scientific and geographical discoveries natural disasters and epidemics it also includes information on the most different fields of human activity chemistry astronomy geography mathematics and so on In parallel the chronology is complemented by data that do not belong to a specific date but to an entire epoch they are each society generalities curiosities customs the religion of each civilization inventions or discoveries that cannot be placed in an exact date etc The result of all this set is one of the most complete chronologies within its reach periodically updated with the latest archaeological and scientific discoveries and that transforms the reader into an eyewitness of the past understanding the relation of geographically distant facts to each other but closely connected in time and influencing unexpected consequences This is something that traditional history has generally ignored when it was not usable A work of this magnitude could not be published in a single book so I have divided it into several collections and the Spanish originals are being translated into French English Italian and Portuguese The chronology goes from prehistory to the present day year by year as far as possible For those who prefer a deeper and more detailed study I have prepared a second chronology day by day this for now covers from 1789 to 1946 divided into five collections
