It poses the six fundamental questions every writer must answer. It is the prewriting stage. These questions are meant to guide the writer in coming up with amazing written content. Chapter three focuses on how to write a blog post. It contains simple steps to creating a blog post. Each step is discussed extensively. Chapters four and five focus on two important aspects. Chapter four is on headlines. It is possible to rank as number one for a search term and still lose traffic to those in numbers three and four. Eventually you will lose that ranking. This is because the headline fails to grab attention. Chapter five deals with introductions. First impressions also matter on the internet. You can either gain traffic or lose it with your introduction. It is where you ignite curiosity and at the same time state the value proposition what you will talk about subsequently. Chapter six deals with long form content. It is okay to write 500 word blog posts. However research included in the book has revealed that long form content converts more and attracts more shares. This chapter helps the reader to construct long form content that will convert. Chapter seven focuses on proofreading. How do you ensure that your work is error free. Most bloggers don't have professional proofreaders to go through their work. This chapter teaches you how to proofread your work yourself. It also suggests free online tools that can aid proofreading. Chapter eight deals with writing for SEO. This is a very fundamental aspect. However SEO is not as difficult as many make it. On page SEO is mostly what we are going to be dealing with. This chapter teaches how to write SEO optimized articles that can rank number one on Google. Chapter nine is the final chapter. It focuses on two aspects copywriting and email marketing. The first aspect provides four important steps to writing copies that convert. This aspect also applies to email copies. It is useful for landing pages web copies and of course email copies. A rare aspect that this book also covers is how to land in the Primary folder of the Gmail inbox.

Q What set of people will this book benefit the most?
A This book will benefit everybody that writes for the internet. As long as you create written content this book is for you. It is the beginner's manual to creating content that converts. There is no niche restriction on this. Whether you write in the medical niche or woodworking niche this book is highly useful. Thank you for your time.
