Optimization Of Chemical Processes:

Optimization of Chemical Processes Thomas F. Edgar, David Mautner Himmelblau, 1988 **Optimization of Chemical Processes** José María Ponce-Ortega, Rogelio Ochoa-Barragán, César Ramírez-Márquez, 2024-05-02 This textbook introduces readers to a comprehensive framework for the application of deterministic optimization strategies in the field of chemical processes with a strong emphasis on sustainability. The book establishes a vital connection between fundamental deterministic optimization principles, optimization tools, and real world application instances, all within the context of environmentally responsible practices. The approach put forth in this book is exceptionally versatile, allowing for the use of many optimization software and deterministic techniques. Contained in the book are many fundamental optimization concepts encompassing linear programming, nonlinear programming, integer programming, and multi objective optimization, all tailored to promote sustainable decision making. Furthermore, the book provides practical examples illustrating the application of these techniques within sustainable chemical processes as tutorials. The textbook also explores the utilization of popular optimization software platforms such as GAMS, MATLAB, and Python, demonstrating how these tools can be leveraged for eco friendly process optimization. Through this comprehensive framework, readers can not only acquire the skills needed to optimize a wide range of processes, but also learn how to do so with sustainability at the forefront of their considerations. This approach streamlines the optimization process, eliminating unnecessary complications along the way and ensuring that environmental and ethical considerations are integral to the decision making process.

Optimization of Chemical Processes Thomas F. Edgar, David Mautner Himmelblau, 1988-01-01 *Optimization of Chemical Processes* T. F. Edgar, 1988-12 **Optimization of chemical processes** Thomas F. Edgar, 1988 **Practical Chemical Process Optimization** Ioannis K. Kookos, 2022-10-28 This text provides the undergraduate chemical engineering student with the necessary tools for problem solving in chemical or bio engineering processes. In a friendly, simple, and unified framework, the exposition aptly balances theory and practice. It uses minimal mathematical concepts, terms, algorithms, and describes the main aspects of chemical process optimization using MATLAB and GAMS. Numerous examples and case studies are designed for students to understand basic principles of each optimization method and elicit the immediate discovery of practical applications. Problem sets are directly tied to real world situations most commonly encountered in chemical engineering applications. Chapters are structured with handy learning summaries, terms, and concepts, and problem sets, and individually reinforce the basics of particular optimization methods. Additionally, the wide breadth of topics that may be encountered in courses such as Chemical Process Optimization, Chemical Process Engineering, Optimization of Chemical Processes, are covered in this accessible text. The book provides formal introductions to MATLAB, GAMS, and a revisit to pertinent aspects of undergraduate calculus. While created for coursework, this text is also suitable for independent study. A full solutions manual is available to instructors who adopt the text for their course.

Mathematical Modeling Approaches for Optimization

of Chemical Processes Gabriela Corsano,2009 Mathematical modelling is a powerful tool for solving optimisation problems in chemical engineering In this work several models are proposed aimed at helping to make decisions about different aspects of the processes lifecycle from the synthesis and design steps up to the operation and scheduling Using an example of the Sugar Cane industry several models are formulated and solved in order to assess the trade offs involved in optimisation decisions Thus the power and versatility of mathematical modelling in the area of chemical processes optimisation is analysed and evaluated
