Parallel Computational Geometry:

Parallel Computational Geometry Selim G. Akl, Kelly A. Lyons, 1993 This is a unified tutorial description of the most widely used models of parallel computation and their application to problems in computational geometry Each chapter offers an in depth analysis of a problem in computational geometry and presents parallel algorithms to solve them Comparative tables summarize the various algorithms developed to solve each problem A wide range of models of parallel computation to develop the algorithms parallel random access machine PRAM are considered as well as several networks for interconnecting processors on a parallel computer Parallel Computational Geometry, 1992 *Parallel Computational Geometry* A.
