Part Object Part Sculpture:

Part Object Part Sculpture Helen Anne Molesworth, 2005 *Part Object Part Sculpture* maps a genealogy of postwar sculpture that challenges the Minimalist Post Minimalist sequence maintained in most accounts of the period

Found Sculpture and Photography from Surrealism to Contemporary Art Julia Kelly, 2017-07-05 Taking its departure point from the 1933 surrealist photographs of involuntary sculptures by Brassa and Dal *Found Sculpture and Photography from Surrealism to Contemporary Art* offers fresh perspectives on the sculptural object by relating it to both surrealist concerns with chance and the crucial role of photography in framing the everyday This collection of essays questions the nature of sculptural practice looking to forms of production and reproduction that blur the boundaries between things that are made and things that are found One of the book's central themes is the interplay of presence and absence in sculpture as it is highlighted disrupted or multiplied through photography's indexical nature The essays examine the surrealist three dimensional object its relation to and transformation through photographs as well as the enduring legacies of such concerns for the artwork's materiality and temporality in performance and conceptual practices from the 1960s through the present *Found Sculpture and Photography* sheds new light on the shifts in status of the art object challenging the specificity of visual practices pursuing a radical interrogation of agency in modern and contemporary practices and exploring the boundaries between art and everyday life

Gabriel Orozco Ann Temkin, 2009 From the developer of **Feminisms with Chinese Characteristics** Ping Zhu, Hui Faye Xiao, 2021-12-28 The year 1995 when the Fourth World Conference on Women was held in Beijing marks a historical milestone in the development of the Chinese feminist movement In the decades that followed three distinct trends emerged first there was a rise in feminist NGOs in mainland China and a surfacing of LGBTQ movements second social and economic developments nurtured new female agency creating a vibrant women oriented cultural milieu in China third in response to ethnocentric Western feminism some Chinese feminist scholars and activists recuperated the legacies of socialist China's state feminism and gender policies in a new millennium These trends have brought Chinese women unprecedented choices resources opportunities pitfalls challenges and even crises In this timely volume Zhu and Xiao offer an examination of the ways in which Chinese feminist ideas have developed since the mid 1990s By juxtaposing the plural feminisms with Chinese characteristics they both underline the importance of integrating Chinese culture history and tradition in the discussions of Chinese feminisms and stress the difference between the plethora of contemporary Chinese feminisms and the singular state feminism The twelve chapters in this interdisciplinary collection address the theme of feminisms with Chinese characteristics from different perspectives rendered from lived experiences historical reflections theoretical ruminations and cultural and sociopolitical critiques painting a panoramic picture of Chinese feminisms in the age of globalization

Art Papers Magazine, 2006 **Cy Twombly's Things** Kate Nesin, 2014 Cy Twombly 1928 2011 is widely acknowledged as one of the postwar period's most influential American artists yet his

sculptures are little known From 1946 onward he made hundreds of rarely exhibited found object assemblages often painted or plastered over with diverse coatings of white Across decades Twombly thus developed a singular strikingly consistent body of work despite the shifting status of sculpture during his lifetime In this revelatory monograph Kate Nesin first establishes then evaluates the artist's long engagement with the historical and contemporary limits of sculpture both as medium and as word While others have described Twombly's three dimensional works as timeless transcendent and poetic Nesin complicates our sense of their so called poetry focusing on the prosaic conspicuously material operations of these sculptural things and emphasizing the inherent difficulties as well as possibilities of the language used to characterize them Through close readings of individual works and in depth analyses of certain guiding concerns such as surface naming gaps and repetitions she illuminates Twombly's remarkable sculptural practice

The Politics of Collecting Eunsong Kim, 2024-06-24 In *The Politics of Collecting* Eunsong Kim traces how racial capitalism and colonialism situated the rise of US museum collections and conceptual art forms Investigating historical legal and property claims she argues that regimes of expropriation rather than merit or good taste are responsible for popular ideas of formal innovation and artistic genius In doing so she details how Marcel Duchamp's canonization has more to do with his patron's donations to museums than it does the quality of Duchamp's work and uncovers the racialized and financialized logic behind the Archive of New Poetry's collecting practices Ranging from the conception of philanthropy devised by the robber barons of the late nineteenth century to ongoing digitization projects Kim provides a new history of contemporary art that accounts for the complicated entanglement of race capital and labor behind storied art institutions and artists Drawing on history theory and economics Kim challenges received notions of artistic success and talent and calls for a new vision of art beyond the cultural institution

Art and knowledge after 1900 James Fox, Vid Simoniti, 2023-12-12 This ground breaking new history of modern art explores the relationship between art and knowledge from the beginning of the twentieth century to the present day Each chapter examines artistic responses to a particular discipline of knowledge from quantum theory and theosophy to cybernetics and ethnic futurisms The authors argue that art's incursion into other intellectual disciplines is a defining characteristic of both modernism and postmodernism Throughout the volume poses a series of larger questions is art a source of knowledge If so what kind of knowledge And ultimately can it contribute to our understanding of the world in ways that thinkers from other fields should take seriously
