Co-partnership ,1925 *Cross-border spatial development in Bavaria* Tobias Chilla,Franziska Sielker,2022-04-14 There are a number of reasons for considering the cross border dimension of Bavarias spatial development at the present time First there is a new awareness of cross border development issues on the level of the federal state of Bavaria This is particularly related to the border between Bavaria and the Czech Republic which is so historically and politically complex that it has long been difficult to address on the Prague Munich diplomatic level Tangible developments have recently been seen here on the middle level At the same time the start of the macro regional strategy EUSALP has led to increased discussion of spatial development instruments in the Alpine region Second the significance of borders was placed on the political agenda with unexpected force by the flows of refugees that largely began in 2015 After many years of widespread talk of a borderlessEurope debates about refugee policies and border controls have made clear that the internal European borders still have considerable political significance In Bavaria this mainly affects its border region with Austria Third a new impetus in cross border cooperation on the European level can be identified in recent years the focus was on activities in the immediate border area based on INTERREG A and Euroregions These remain important but there is also a new impetus on the higher level where macro regions and numerous bilateral and multilateral forms of cooperation are creating new constellations In Bavaria this can be seen particularly in the relatively new European Region of Danube Vltava and through involvement in the Danube and Alpine macro regions
