

groups and in particular child psychiatry and social work. Although part of a social work series the book is intended to be useful to students and practitioners in all the professional groups working in the field of child psychiatry. The authors major orientation is that of a family approach to child-focussed problems, although for clarity they exclude children with mental and physical handicaps and those problems specific to older adolescents.

Child Psychiatry and Social Work is a concise but comprehensive book. The major themes and issues are outlined in the first chapter before the Lasks move on to deal with causation, assessment and common presenting problems. Chapters are devoted to four major modes of intervention in child psychiatric practice: family and marital; individual; groupwork and behaviour modification. The latter part of the book is perhaps less cohesive although the chapters on consultation and liaison and the reference sections were in my opinion excellent.

I found *Child Psychiatry and Social Work* a somewhat daunting book to read, both because it is a long overdue addition to the literature and also because for a small well set out book it covers remarkably comprehensively a wide range of diverse issues and themes. It is neither lightweight nor waffly – a criticism levelled at much social work literature. It is intended to be, and certainly succeeds in being, a broad introduction to assessment and management of child focussed problems, but I felt that it went even further than this. The authors hoped that *Child Psychiatry and Social Work* would have application to all professional groups involved in child care services – and in my opinion they achieved this. It is a book that will have an important place on the reading lists for social work training courses.

Child Psychiatry and Social Work is a focussed academic piece of work well suited to the needs of students and practitioners in the field. It is clearly the result of long hours of textbook research as well as sound clinical experience. There are, unfortunately, one or two factual errors which could usefully be corrected when it is reprinted. It would be a pity if such a long awaited addition to social work literature lost credibility unnecessarily.
