Pathways from Ethnic Conflict John Coakley, 2013-09-13 The book begins with an agenda setting introduction which will provide an overview of the central question being addressed such as the circumstances associated with the move towards a political settlement the parameters of this settlement and the factors that have assisted in bringing it about The remaining contributions will focus on a range of cases selected for their diversity and their capacity to highlight the full gamut of political approaches to conflict resolution The cases vary in the intensity of the conflict from Belgium where it is potential rather than actual to Sri Lanka where it has come to a recent violent conclusion in the geopolitical relationship between the competing groups from Cyprus where they are sharply segregated geographically to Northern Ireland where they are intermingled in the extent to which a stable constitutional accommodation has been reached ranging from the Basque Country with a large range of unresolved problems to South Africa which has achieved a significant level of institutional stability This book ranges over the world's major geopolitical zones including Asia the Middle East Africa and Europe and will be of interest to practitioners in the field of international security This book was published as a special issue of *Nationalism and Ethnic Politics*

**Immigration Phobia and the Security Dilemma** Mikhail A. Alexseev, 2006 Immigration phobia is a paradoxical global phenomenon neither theories that link conflict to symbolic and realistic threats nor the contact hypothesis can systematically explain intense anti migrant alarmism and exclusionism toward marginally small migrant minorities Through a careful comparative study of immigration attitudes in the Russian Far East the EU and the United States this book is the first to demonstrate that concerns about national identity and economic interests associated with migration are themselves ignited by a unique perceptual logic of the security dilemma Regression analysis and case studies trace support for expulsion of migrants to human yearning for pre-emptive self-defense under uncertainty Alarmism and hostility arise from ambiguities about immigration consequences and migrants motivations Framing migration as a national security problem is therefore logical but counterproductive The book instead recommends managing migration through economic incentives and new institutions at the global national and local level

*Political Ethnography* Edward Schatz, 2013-02-11 Scholars of politics have sought in recent years to make the discipline more hospitable to qualitative methods of research Lauding the

results of this effort and highlighting its potential for the future Political Ethnography makes a compelling case for one such method in particular Ethnography the contributors amply demonstrate in a wide range of original essays is uniquely suited for illuminating the study of politics Situating these pieces within the context of developments in political science Edward Schatz provides an overarching introduction and substantive prefaces to each of the volume s four sections The first of these parts addresses the central ontological and epistemological issues raised by ethnographic work while the second grapples with the reality that all research is conducted from a first person perspective The third section goes on to explore how ethnographic research can provide fresh perspectives on such perennial topics as opinion causality and power Concluding that political ethnography can and should play a central role in the field as a whole the final chapters illuminate the many ways in which ethnographic approaches can enhance improve and in some areas transform the study of politics
