Mortal Questions:

Mortal Questions Thomas Nagel, 2012-03-26 Thomas Nagel's *Mortal Questions* explores some fundamental issues concerning the meaning, nature, and value of human life. Questions about our attitudes to death, sexual behaviour, social inequality, war, and political power are shown to lead to more obviously philosophical problems about personal identity, consciousness, freedom, and value. This original and illuminating book aims at a form of understanding that is both theoretical and personal in its lively engagement with what are literally issues of life and death.

After Philosophy Kenneth Baynes, James Bohman, Thomas A. McCarthy, Thomas McCarthy, 1987 *After Philosophy* provides an excellent framework for understanding the most important strains of current philosophical work in North America, England, France, and Germany. The selections from the work of fourteen contemporary philosophers not only display the multiplicity of approaches being pursued since the breakup of any consensus on what philosophy is but also help to clarify this proliferation of views and to spell out today's basic options for doing or not doing philosophy today. With a general introduction delineating what is in dispute between the different parties to the end of philosophy debates, brief introductions to the thought of each author, and suggestions for further reading following each selection, *After Philosophy* is ideally suited for use in any course that includes an overview of the bewildering variety of contemporary approaches to philosophy. The major sections and contributors are: I The End of Philosophy Richard Rorty, Jean-François Lyotard, Michel Foucault, Jacques Derrida; II The Transformation of Philosophy: Systematic Proposals Donald Davidson, Michael Dummett, Hilary Putnam, Karl Otto Apel, Jürgen Habermas; III The Transformation of Philosophy: Hermeneutics, Narrative, Rhetoric Hans-Georg Gadamer, Paul Ricoeur, Alasdair MacIntyre, Hans Blumenberg, Charles Taylor. Kenneth Baynes is currently doing postgraduate research at the University of Frankfurt. James Bohman lectures in philosophy at Boston University, and Thomas McCarthy is a professor of philosophy at Northwestern University and the editor of the MIT Press series *Studies in Contemporary German Social Thought*.

Embodied Minds in Action Robert Hanna, Michelle Maiese, 2009-01-08 *Embodied Minds in Action* works out a unified treatment of three fundamental philosophical problems: the mind-body problem, the problem of mental causation, and the problem of action. Hanna and Maiese offer a new paradigm for contemporary mainstream research in the philosophy of mind and cognitive neuroscience.

From Eden to Interstellar Space Sarah Anne Beattie, 2025-01-23 This book is a response to two questions: The first concerns how we can do better as human beings in addressing the broken relationships between humankind, the environment in which we live, and the other species with which we coexist in an increasingly fragile

world The second concerns whether secular humanism can provide the answer or if there is an important contribution that Christian faith can offer to an understanding of the human condition that will empower effective transformational action The book explores the possibility of developing an interpretive approach to biblical narrative that allows a biblical perspective of reality to provide an important complementary rather than competing supplement to developing scientific perspectives of reality These are perspectives emerging from quantum mechanics and astrophysics that challenge both our conceptual ability and the limits of language in articulating mystery that in resisting physical explanation appears to demand new or different ways of thinking about ourselves and the world in which we live

Sport, Play, and Ethical Reflection Randolph Feezell, Randolph M. Feezell, 2006-09 In paperback for the first time Randolph Feezell's *Sport Play and Ethical Reflection* immediately tackles two big questions about sport What is it and Why does it attract so many people Feezell argues that sports participation is best described as a form of human play and the attraction for participants and viewers alike derives from both its aesthetic richness and narrative structure He then claims that the way in which sports encourage serious competition in trivial pursuits is fundamentally absurd and therefore participation requires a state of irony in the participants where seriousness and playfulness are combined Feezell builds on these conclusions addressing important ethical issues arguing that sportsmanship should be seen as a kind of Aristotelian mean between the extremes of over and under investment in sport Chapters on cheating running up the score and character building stress sport as a rule governed tradition bound practice with standards of excellence and goods internal to the practice With clear writing and numerous illuminating examples Feezell demonstrates deep insight into both of his subjects
