Real Rules:

The Theory of Rules Karl N. Llewellyn, 2011-04 Karl N Llewellyn was one of the founders and major figures of legal realism and his many keen insights have a central place in American law and legal understanding Key to Llewellyn's thinking was his conception of rules put forward in his numerous writings and most famously in his often mischaracterized declaration that they are pretty playthings Previously unpublished *The Theory of Rules* is the most cogent presentation of his profound and insightful thinking about the life of rules This book frames the development of Llewellyn's thinking and describes the difference between what rules literally prescribe and what is actually done with the gap explained by a complex array of practices conventions professional skills and idiosyncrasies most of which are devoted to achieving a law's larger purpose rather than merely following the letter of a particular rule Edited annotated and with an extensive analytic introduction by leading contemporary legal scholar Frederick Schauer this rediscovered work contains material not found elsewhere in Llewellyn's writings and will prove a valuable contribution to the existing literature on legal realism

Educating Oneself in Public Michael S. Moore, 2000 The eleven essays in *Educating Oneself in Public* Critical Essays in Jurisprudence constitute an education in the Anglo American jurisprudence of the second half of the twentieth century The book examines both the thought of major figures such as H L A Hart Joseph Raz Ronald Dworkin Lon Fuller and Richard Rorty and the general themes of major movements such as legal realism post modernism and pragmatism Despite this focus on the thoughts of others the book is not a survey but is a critical probing of particular ideas often attributed to such figures Detailed depth of understanding is sought about Hart's conception of a general jurisprudence that describes law in general Dworkin's conception of an internal jurisprudence that interprets the concept of law of our legal culture Fuller's ideal of a functional jurisprudence that seeks the essence of law in the values it serves the place of rules in legal and moral reasoning Raz's idea that laws give exclusionary reasons to legal actors subject to such laws how judges should reason according to the legal realists whether there are right answers to all disputed law cases whether behind the obvious law of legal rules there can exist an unobvious law of legal principles Finnis's conception of the common good as the function law
