Irwin,2007-11-23 The Engineering of Complex Real Time Computer Control Systems brings together in one place important contributions and up to date research results in this important area The Engineering of Complex Real Time Computer Control Systems serves as an excellent reference providing insight into some of the most important research issues in the field **Distributed Computer Control Systems 1988** Th. d'Epinay Lalive,M.G. Rodd,2014-06-28 Continuing the forward thinking of previously held distributed computer control systems meetings this volume discusses both the positive and negative views on trends in OSI based communications the development of the fieldbus the importance of the incorporation into basic real time operating systems to be used for distributed systems of concepts such as time stamping and access to global time bases and the influence of artificial intelligence based technologies on the distributed computer control world **Distributed Computer Control Systems 1994** J.A. De La Puente,M.G. Rodd,2014-05-23 One of the most important issues in the development of distributed computer control systems is the ability to build software and hardware which is both reliable and time deterministic this is an area where control engineering and computer science naturally meet This publication brings together the latest key papers on research and development in this field allowing cross fertilization between the two engineering disciplines involved and allowing both academics and industrial practitioners to find new insights and learn from each other s views *Distributed Computer Control Systems 1989* L. Motus,S. Narita,2014-07-04 The focus of the workshop was on recent advances in the theory applications and techniques for distributed computer control systems Topics included tools and methods for inner layers of DCCS application papers presenting operational DCCS the infiltration of true real time or time critical concepts and the emergence of artificial intelligence methods in DCCS applications leading to novel computer architectures being integrated in computer networks The book will be of interest not only to those involved in DCCS but also software engineers and distributed computing scientists **Computer Control of Real-time Processes** Stuart Bennett,1990 Based on a series of lectures given at a Vacation School for postgraduate students in the areas of control and instrumentation held at the University of Sheffield It covers four major themes design and tuning of controllers the hardware technology software design and applications **A Survey of Real-time Computer Control Systems** Liew Chee Fatt,1992 **Scientific and Technical Aerospace Reports** , Lists citations with abstracts for aerospace related reports obtained from world wide sources and announces documents that have recently been entered into the NASA Scientific and Technical Information Database *Computers in Control* ,1961 **Library of Congress Subject Headings** Library of Congress,2013 *Library of Congress Subject Headings* Library of Congress.
