

SOCIAL CONSTRUCTION OF RACE

The social construction of race is a sociological concept that holds that the category of race is defined in language and culture rather than objective or biological fact (Gergen, 2015).

DEFINITION

"Race is a recent human invention, a social construct designed to divide members of a society into a hierarchy of social, economic, and political advantage or disadvantage based on a set of randomly selected normal human variations in phenotype."

(Feldman et al., 2022)

EXAMPLE

Italians as whites - Dewhurst (2008) has demonstrated how Italians were not seen as white people in early colonial Australia. As a result, they faced increased discrimination. Over time, as Italian-Australians assimilated and influx of darker-skinned migrants arrived, Italians slowly became included in the category of whiteness in Australian discourse.
