*AI Agents at Work for Beginners* Taylor Brooks, 2026-03-19

This book shows you how to build simple, practical AI agents that handle everyday work tasks without coding. It is designed for beginners: office workers, freelancers, and anyone who wants to reduce repetitive work such as email handling, meeting preparation, and daily task planning using clear, structured methods.

Most people start using AI tools like ChatGPT or Claude but quickly run into problems. They are unsure what to click first, how to connect tools, or how to turn a single prompt into a repeatable process. Interfaces include options like agent mode, integrations, triggers, and workflows, but it is not clear which settings matter, which can be ignored, or how to confirm if something is working correctly. Online tutorials often skip steps, assume prior knowledge, or show results without explaining how the setup actually works.

This book removes that confusion by focusing on a linear, step-by-step approach to building AI agents for beginners using simple, no-code tools and structured workflows. You are shown exactly where to start, what action to take first, and how each step connects to the next. Every stage includes checkpoints so you can confirm that your setup is working before moving forward. You will build small, realistic systems that can be used immediately in everyday work. A

simple AI email sorting agent that reads incoming messages and organises them based on clear rules An AI email summariser workflow that turns long emails into short actionable notes A meeting preparation agent that gathers context and produces a structured briefing A meeting notes and action item agent that converts conversations into clear tasks A daily task list agent that creates a structured plan from scattered inputs Each example is built using the same repeatable framework so you always know what stage you are in This includes defining the task setting the trigger preparing the prompt structuring the output applying rules and validating results This consistent pattern makes it easier to move from one use case to another without starting over The focus is on practical execution using no code AI automation not theory You will learn how to connect tools structure prompts and create simple AI workflow automation systems that can run daily tasks with minimal input Clear guidance is provided on how to test your setup identify errors and adjust outputs so they remain reliable Keywords and concepts covered naturally throughout the book include AI agents for work build AI agents no coding automate work tasks with AI AI workflow automation beginners no code automation tools AI email automation AI meeting notes workflow AI task management system AI prompt templates AI agents step by step simple AI workflows AI productivity systems AI office automation AI tools for work AI task automation guide AI agents without coding AI daily workflow system By following the step by step structure you will move from isolated prompts to simple repeatable systems that handle real work tasks The same framework is reused throughout so each new agent builds on what you have already set up reducing confusion and making the process consistent from start to finish

The No-code AI Agent Builder Stephen K Thornton, 2025-09-28 Have you ever wished you could build intelligent AI agents without spending years learning complex programming languages What if you could design train and launch powerful AI tools that work for you without writing a single line of code If those questions make you curious then The No Code AI Agent Builder was written with you in mind This book is your complete guide to understanding and creating AI agents using accessible no code tools even if you have zero technical background It s designed to speak directly to you not at you Instead of burying you under jargon and complicated theories it walks you step by step through how non programmers are now building intelligent systems that automate tasks answer questions personalize customer experiences and make smarter business decisions all visually and all without traditional coding What makes this book different is how it connects the technical with the practical You ll explore how no code AI platforms work behind the scenes how to design and train your own agents and how to connect them with existing workflows or tools you already use You ll discover how AI agents learn from data how they make decisions and how you can customize their behavior to fit your needs whether you re trying to streamline your business launch a new product or create a smarter personal assistant And here s something worth thinking about Why should only developers and data scientists benefit from AI when tools now exist that allow anyone entrepreneurs freelancers educators small business owners even hobbyists to create their own AI solutions The truth is the barrier to entry has never been lower and this book shows you

exactly how to cross it with confidence Inside these pages you ll learn how to Understand the building blocks of AI agents without technical overwhelm Design configure and deploy your own no code AI agents step by step Automate repetitive tasks and decision making processes visually Connect your AI creations to real world applications and business workflows Scale and manage your agents responsibly with ethical and strategic insights Whether you re a complete beginner or a professional seeking faster more efficient ways to build AI driven systems The No Code AI Agent Builder is your blueprint for turning ideas into working intelligent agents quickly creatively and without writing code The future of AI isn t reserved for engineers anymore it s now open to anyone willing to explore it So the question is are you ready to start building your own AI agents and transforming the way you work think and create
