Things Being Equal is a proven guide to succeeding in math and a passionate argument for why this success can and must be

intellectual potential in all children through learning math Math Mighton says provides us with mental tools of incredible  
power When we learn math we learn to see patterns to think logically and systematically to draw analogies to perceive risk to  
understand cause and effect among many other critical skills Yet we tolerate and in fact expect a vast performance gap in  
math among students and live in a world where many adults aren t equipped with these crucial tools This learning gap is  
unnecessary dangerous and tragic he cautions and it has led us to a problem of intellectual poverty which is apparent  
everywhere in fake news political turmoil floundering economies even in erroneous medical diagnoses In All Things Being  
Equal Mighton argues that math study is an ideal starting point to break down social inequality and empower individuals to  
build a smarter kinder more equitable world Bringing together the latest cognitive research and incremental learning  
strategies Mighton goes deep into the classroom and beyond to offer a hopeful and urgent vision for a numerate society
