book that make doing mental math as easy as reading a comic Here is a glimpse of what you will be able to master Mentally add large numbers Example Add 8739 5492 in your head in seconds Subtract numbers fast Example Mentally subtract 7520 4998 without writing anything down Multiplication tricks to multiply three digit numbers Example Multiply 323 x 123 in your head Square large numbers in seconds Example Calculate 64 x 64 faster than a calculator Mentally divide large numbers Example Divide 601324 by 73 entirely in your head Quickly check a calculation with 90% accuracy without re calculating Overcome math anxiety Cement your mental math skills with bonus weekly training This book only has the best techniques used by over 27 mental and Vedic math experts across the world The techniques in this book are so simple you will wonder why nobody taught you this before You will be able to master it even if you have failed math in school Imagine waking up tomorrow being able to do lightning fast math in your head Your family friends will look at you like you are some kind of a genius Since you do the calculations in your head you will acquire better mental habits in the process So you will not just look like a genius You will actually be one Buy Now To Become A Human Calculator Every minute you wait to buy this book is another minute you don t see the benefit of being good with math numbers Put the power of mental math to work in your life so you can quickly easily make math and numbers more useful develop better memory habits increase concentration develop new ways to think and do speed math entirely in your head faster than a calculator Get your copy today A MUST BUY for students of Vedic Mathematics GMAT GRE SAT Case Study Interview and Case Interview *Quill & Quire* ,1990 **Boys' Life** ,1972 *Editor & Publisher* ,1981
