world's oldest civilizations and is regarded as one of the cradles of civilization. The Zhou dynasty (1046–256 BC) supplanted the Shang and introduced the concept of the Mandate of Heaven to justify their rule. The central Zhou government began to weaken due to external and internal pressures in the 8th century BC and the country eventually splintered into smaller states during the Spring and Autumn period. These states became independent and warred with one another in the following Warring States period. Much of traditional Chinese culture, literature, and philosophy first developed during those troubled times. In 221 BC, Qin Shi Huang conquered the various warring states and created for himself the title of Huangdi or emperor of the Qin, marking the beginning of imperial China. However, the oppressive government fell soon after his death and was supplanted by the longer-lived Han dynasty (206 BC–220 AD). Successive dynasties developed bureaucratic systems that enabled the emperor to control vast territories directly. In the 21 centuries from 206 BC until AD 1912, routine administrative tasks were handled by a special elite of scholar-officials. Young men well-versed in calligraphy, history, literature, and philosophy were carefully selected through difficult government examinations. China's last dynasty was the Qing (1644–1912), which was replaced by the Republic of China in 1912 and in the mainland by the People's Republic of China in 1949. Chinese history has alternated between periods of political unity and peace and periods of war and failed statehood, the most recent being the Chinese Civil War (1927–1949). China was occasionally dominated by steppe peoples, most of whom were eventually assimilated into the Han Chinese culture and population. Between eras of multiple kingdoms and warlordism, Chinese dynasties have ruled parts or all of China; in some eras, control stretched as far as Xinjiang and Tibet, as at present. Traditional culture and influences from other parts of Asia and the Western world, carried by waves of immigration, cultural assimilation, expansion, and foreign contact, form the basis of the modern culture of China.

**Our View of Civilization** Wu Genyou, **Supergrid and Superblock** Xiaofei Chen, 2022-10-03. In this superbly illustrated book, Xiaofei Chen presents the first analysis in English of a ubiquitous East Asian urban phenomenon: the supergrid and superblock urban structure. The book opens with an introductory essay by Barrie Shelton, in which he sets the scene for what is to follow, emphasizing how alien this structure was to Western urban design culture, where radial patterns of development were the

norm Then in her first chapter Chen explains the make up of the supergrid and superblock urban structure and its contrasting Chinese and Japanese forms In the following three chapters she digs deep into the history cultural origins and underlying design philosophy of the supergrid and superblock to show how under different cultural influences the model has developed into two distinct forms Two further chapters 5 and 6 provide detailed analysis of two sample superblocks in China in Xi an and Nanjing and two in Japan in Kyoto and Osaka to reveal the relative advantages and disadvantages of how the structure is manifest in the two countries In her conclusion she discusses her findings to show how and why the supergrid and superblock structure is a valuable urban design model which with regional adjustments can be used effectively in cities other than those of East Asia
