Orders Of Discourse:

The Orders of Discourse John G. Gunnell,1998 In this insightful book distinguished political scientist John G Gunnell explores the relationship between social science and philosophy and the range of problems that have attended this relationship Gunnell argues that social science has turned to philosophy especially to areas such as the philosophy of science and other sites of philosophical foundationalism in search of cognitive identity and the grounds for normative and empirical judgment Gunnell s emphasis is on political and social theory and the theoretical constitution of social phenomena "Of Many Heroes" G. N. Devy,1998 This books is a sequel to After Amnesia Dr Devy s Sahitya Akademi Award winning study Of Many Heroes attempts to reconstruct the convention s of literary history in India prior to India s colonial encounter with the modern West In some sections of the essay the main focus is the mutual dependence of western literary history and cultural colonialism *Discourse as Cultural Struggle* Shi-xu,2007 The volume argues through theory and research in multicultural perspectives that discourse communication is a site of cultural contest change and cooperation and sets out a practical research agenda for this new area *Language and Power* Norman Fairclough,1989 Examines how language functions in maintaining and changing power relations in modern society It discusses ways of analysing language which can reveal these processes how people can become more conscious of them and more able to resist and change them **Social Work in Times of Neoliberalism** Vishanthie Sewpaul,Dorothee Hölscher,2004 Tracing the social political economic and ideological factors that have impacted the development of social work from both a global and a local perspective the authors identify the historical and contemporary conflicting and competing strands Redescribing God Todd B. Pokrifka,2010-09-09 Despite the voluminous and ever growing scholarly literature on Karl Barth penetrating accounts of his theological method are lacking In an attempt to fill this lacuna Todd Pokrifka provides an analysis of Barth s theological method as it appears in his treatment of three divine perfections unity constancy and eternity in Church Dogmatics II 1 chapter VI In order to discern the method by which Barth reaches his doctrinal conclusions Pokrifka examines the respective roles of Scripture tradition and reason the threefold cord in this portion of the Church Dogmatics In doing so he finds that for Barth Scripture functions as the authoritative source and basis for theological critique and construction and tradition and reason are functionally subordinate to Scripture Yet Barth employs a predominantly indirect way of relating Scripture and theological proposals a way in which tradition and reason play important mediatory roles Barth s approach to theology involves the humble yet serious attempt to redescribe God that is to say again on a human level what God has already said in the divine self revelation attested in Scripture Redescribing God features an original conceptual framework for the analysis of Barth s method and an extensive application of that framework in the context of close readings of portions of the Church Dogmatics Through this process it draws from critiques and complements a wide variety of Barth scholarship on topics such as the role of Scripture and theological exegesis in Barth the role of tradition in Barth the meaning and role of reason in Barth and the

nature of Barth's doctrine of divine perfections The book also provides a fruitful basis for those who wish to learn from Barth's distinctive way of constructing the Christian doctrine of God as an attempt to obey God's self-revelation [The Singular Universe and the Reality of Time](#) Roberto Mangabeira Unger, Lee Smolin, 2014-12-08 Cosmology is in crisis The more we discover the more puzzling the universe appears to be How and why are the laws of nature what they are A philosopher and a physicist world renowned for their radical ideas in their fields argue for a revolution To keep cosmology scientific we must replace the old view in which the universe is governed by immutable laws by a new one in which laws evolve Then we can hope to explain them The revolution that Roberto Mangabeira Unger and Lee Smolin propose relies on three central ideas There is only one universe at a time Time is real everything in the structure and regularities of nature changes sooner or later Mathematics which has trouble with time is not the oracle of nature and the prophet of science it is simply a tool with great power and immense limitations The argument is readily accessible to non-scientists as well as to the physicists and cosmologists whom it challenges **The Americana**, 1911 *The Reality of God and Historical Method* Samuel V. Adams, 2015-11-09 Samuel Adams engages the classic problem of the relation between faith and history from the perspective of apocalyptic theology in critical dialogue with the work of N. T.
