Polymer Reactive Processing Stabilisation And Functionalisation:

Polymer Reactive Processing, Stabilisation and Functionalisation I. Meisel, C. S. Kniep, S. Spiegel, K.

Grieve, 2002-04-10 In order to further develop the applications of polymers it is necessary to control their useful life i.e. we must know how to stabilise polymers effectively We must therefore understand the mechanisms that cause polymers to degrade and the effects of processing and modifying the polymers on their stability The 1st Conference on Polymer Modification Degradation and Stabilisation MoDeSt 2000 was held in Palermo Italy in 2000 It brought together scientists and technologists from a range of academic and industrial backgrounds to discuss the topics in a dedicated environment This volume of Macromolecular Symposia presents invited lectures from two of the sessions Processing and Melt Stabilisation and Functionalisation and Reactive Processing It therefore represents a good sample of very recent work in these areas

Handbook of Polymer Degradation S. Halim Hamid, 2000-06-30 Covers recent advances in polymer degradation and stabilization Focuses on the basics of photo and bio degradability Delineates special and general environmental parameters such as solar irradiation temperature and agrochemical exposure Surveys plastic waste disposal strategies such as recycling incineration chemical recovery by pyrolysis and source reduction

Commercial Polymer Blends L.A. Utracki, 2013-11-27 This book provides an in depth and unparalleled presentation of the compositions of virtually all polymer blends

Reactive Polymers Hans-Jürgen Adler, 2001-06-15 This volume of Macromolecular Symposia contains papers presented at the 1st International Symposium on Reactive Polymers in Inhomogeneous Systems in Melts and at Interfaces held in Dresden Germany in July 2000 It includes 42 contributions from renowned scientists dealing with topics of current interest in the field of synthesis characterization and application of reactive and functional polymers The papers add significantly to the current understanding of the role of reactive polymers in phenomena such as adhesion colloidal stability corrosion resistance and biocompatibility comprehension which is vital for improving the polymer technologies available today and for the development of new applications

Functionalized Polymeric Materials in Agriculture and the Food Industry Ahmed Akelah, 2013-07-03 The purpose of this book will be to demonstrate 1 the newly developed method of using reactive functionalized materials in agriculture to solve the economic and public health problems associated with using conventional agrochemicals and 2 new technology aimed at achieving the greening of chemistry to meet appropriate environmental standards in both agriculture and industrial foodstuffs production More specifically the book will accomplish this goal by addressing 3 key issues in the field 1 the production of reactive functionalized materials with enhanced properties that offer a major opportunity to overcome the disadvantages of using traditional materials 2 the applications of functionalized materials in agriculture for the purpose of solving the economic and the environmental pollution problems associated with the uses of conventional agrochemicals and 3 the contribution of polymers in solving problems associated with conventional procedures of food growth and processing including those used in the dairy industry sugar and fruit juices beer and wine
