An Introduction to Network Programming with Java Jan Graba,2013-08-13 Since the second edition of this text the use of the Internet and networks generally has continued to expand at a phenomenal rate This has led to both an increase in demand for network software and to improvements in the technology used to run such networks with the latter naturally leading to changes in the former During this time the Java libraries have been updated to keep up with the new developments in network technology so

that the Java programming language continues to be one of the mainstays of network software development. In providing a very readable text that avoids getting immersed in low level technical details while still providing a useful practical guide to network programming for both undergraduates and busy IT professionals this third edition continues the trend of its predecessors. To retain its currency the text has been updated to reflect changes that have taken place in Java's network technology over the past seven years including the release of Java 7 whilst retaining its notable features of numerous code examples, screenshots and end of chapter exercises.

Raspberry Pi with Java: Programming the Internet of Things (IoT) (Oracle Press) Stephen Chin, James Weaver, 2015-10-23 Use Raspberry Pi with Java to create innovative devices that power the internet of things. Raspberry Pi with Java Programming the Internet of Things IoT fills an important gap in knowledge between seasoned Java developers and embedded hardware gurus taking a project based approach to skills development from which both hobbyists and professionals can learn. By starting with simple projects based on open source libraries such as Pi4J hobbyists can get immediate results without a significant investment in time or hardware. Later projects target simplified industrial use cases where professionals can start to apply their skills to practical problems in the fields of home automation, healthcare and robotics. This progression prepares you to be an active participant in the IoT revolution that is reshaping our lives. For the hobbyist Hardware used in projects is affordable and easily accessible. Follows a project based learning approach with a gradual learning curve. Projects are based on open source code repositories with commercial friendly licenses. For the professional computer engineer Uses an industry standard platform that allows for high performance secure production ready applications. Introduces Java SE Embedded for large devices and Java ME Embedded for small devices. Code is portable to a wide variety of ARM and MIPS based platforms. Provides practical skill development with advanced projects in the fields of home automation, healthcare and robotics.
