F. R. Henderson, 2016-10-12 Excerpt from The Science of War A Collection of Essays and Lectures 1891 1903 For some years before his death it had been Colonel Henderson s intention to make a collection of his occasional papers and to publish them in book form in the hope that they might be of service to the profession he loved so well Unfortunately he never found time to carry this intention into effect and consequently in the absence of the master hand the duty of selection has been entrusted to me In the years covered by these pages 1891 1903 the world learned much of war It is therefore probable that something of what was written in 1891 would not have been written in 1903 it is even possible that in some respects the war in the Far East would have affected the opinions formed in South Africa Nevertheless I have found so much food for refection in each one of these papers that I have not hesitated to include even the very earliest of them for in these earlier writings is to be found the germ at least of nearly all the military thought of to day Similarly the text books referred to are not those now in use For unless tactical text books were constantly to change they would soon cease to be of any value whatever The importance of these books as the foundation but the foundation only of a military education is as great now as

ever it was About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

Science and War Sir William Osler,1915 *The Science of War and Peace* Robin Clarke,1971 *The Science of War* George Francis Robert Henderson,1916 Can Science End War Everett Dolman,2015-10-19 Free roaming killer drones stalk the battlespace

looking for organic targets Human combatants are programmed to feel no pain Highpower microwave beams detonate munitions jam communications and cook internal organs Is this vision of future war possible or even inevitable In this timely new book Everett Carl Dolman examines the relationship between science and war Historically science has played an important role in ending wars think of the part played by tanks in breaching trench warfare in the First World War or atom bombs in hastening the Japanese surrender in the Second World War but to date this has only increased the danger and destructiveness of future conflicts Could science ever create the conditions of a permanent peace either by making wars impossible to win or so horrific that no one would ever fight Ultimately Dolman argues that science cannot on its own end war without also ending what it means to be human *Science of War* Henderson G.
