**Motivation at School** Kathryn R. Wentzel, David B. Miele, 2009-09-10 The Handbook of Motivation at School presents the first comprehensive and integrated compilation of theory and research on children's motivation at school. It covers the major theoretical perspectives in the field as well as their application to instruction, learning, and social adjustment at school. Key Features: Comprehensive: no other book provides such a comprehensive overview of theory and research on children's motivation at school. Theoretical/Applied: the book provides a review of current motivation theories by the developers of those theories as well as attention to the application of motivation theory and research in classrooms and schools. Chapter Structure: chapters within each section follow a similar structure so that there is uniformity across chapters. Commentaries: each section ends with a commentary that provides clear directions for future research.

*Re-visioning Science Education from Feminist Perspectives* Kathryn Scantlebury, 2010 Further, these women work in educational institutions that have higher status and prestige than their sisters in elementary, middle, or high schools. Second, female professors are bearded mothers. Women who have engaged in science education value rationality and logic and assume authority as participants in academe. The use of logic, the acceptance of authority, and the assumption of power are masculine gender-stereotyped characteristics. This situation places women in a paradox because others, including peers and students, expect them to display stereotypic female gender dispositions such as mothering, nurturing, sacrificing their needs for others, and a commitment to the institution.
