## **Mathematics A Basic Course:**

**Mathematics, a Basic Course** David G. Salten, 1957      **Fundamentals of Mathematics I** Dan Ellison, Jane Knobles, Houston Independent School District, 1979      **A Basic Course in Algebraic Topology** William S. Massey, 2019-06-28 This textbook is intended for a course in algebraic topology at the beginning graduate level. The main topics covered are the classification of compact 2-manifolds, the fundamental group, covering spaces, singular homology theory, and singular cohomology theory. These topics are developed systematically, avoiding all unnecessary definitions, terminology, and technical machinery. The text consists of material from the first five chapters of the author's earlier book *Algebraic Topology: an Introduction* (GTM 56) together with almost all of his book *Singular Homology Theory* (GTM 70). The material from the two earlier books has been substantially revised, corrected, and brought up to date.      **Mathematics, a Basic Course** David George Salten, Robert W. Dever, 1971      **A Course in Basic Mathematics for Colleges** Mathematical Association of America. Committee on the Undergraduate Program in Mathematics, 1971      **Basic Mathematics for College Students** Alan S. Tussy, R. David Gustafson, 2005-11 The fundamental goal in Tussy and Gustafson's *BASIC MATHEMATICS FOR COLLEGE STUDENTS* Third Edition is to teach students to read, write, and think about mathematics through building a conceptual foundation in the language of mathematics. The book blends instructional approaches that include vocabulary practice and well-defined pedagogy along with an emphasis on reasoning, modeling, communication, and technology skills. Also, students planning to take an introductory algebra course in the future can use this text to build the mathematical foundation they will need. Tussy and Gustafson understand the challenges of teaching developmental students, and this book reflects a holistic approach to teaching mathematics that includes developing study skills, problem solving, and critical thinking alongside mathematical concepts. New features in this edition include a pretest for students to gauge their understanding of prerequisite concepts, problems that make correlations between student life and the mathematical concepts, and study skills information designed to give students the best chance to succeed in the course. Additionally, the text's widely acclaimed Study Sets at the end of every section are tailored to improve students' ability to read, write, and communicate mathematical ideas.      *Fundamentals of mathematics, IA-B* Lerma Engberg, 1975      **Famous Websites in Mathematics** KUPARALA VENKATA VIDYASAGAR, 2021-12-22 Department of Mathematics SVLNS Government Degree College Bheemunipatnam Visakhapatnam District launching the book titled *Famous Website in Mathematics*.
