

# National Wildlife Refuge System

The National Wildlife Refuge System is a collection of United States lands and waters managed specifically for wildlife. Units of the system stretch across the continent, from the icy north shore of Alaska to the balmy Florida Keys, and beyond to tropical islands in the Caribbean and the South Pacific.

Over 560 refuges plus numerous wetland management districts and marine national monuments protect more than 850 million acres. They range in size from Minnesota's tiny Mille Lacs (less than an acre) to Alaska's sprawling Arctic (almost 20 million acres). Small or large, each refuge provides vital habitat for America's wildlife populations.
