Reproductive Genetics Gender And The Body:

Reproductive Genetics, Gender and the Body Elizabeth Ettorre,2013-04-15 This book is all about reproductive genetics a sociological concept developed to define the use of DNA based technologies in the medical management and supervision of reproduction and pregnant women In a searching analysis Elizabeth Ettorre uncovers the hidden social processes involved in the development of these technologies Focussing on prenatal screening she explores how the key concepts of gender and the body are intertwined with the process of building genetic knowledge and some of the unintended consequences for women These include the injection of biology into social relationships and the development of a gendered discourse of shame and stigmatisation in which the perfect body becomes idealised and new conceptions of disability are shaped It becomes clear that the modernist tradition of scientific disinterestedness is being replaced by a new ethic the making of moral judgements by scientists Reproductive Genetics Gender and the Body draws on interviews with European medical legal and nursing professionals and raises important issues around the gendered female body the site of genetic capital It challenges professional and scholar alike to grapple with and think through their responsibilities in this complex field where the competing issues have yet to be resolved

Key Concepts in Body and Society Kate Cregan,2012-08-16 This is a very useful book outlining the key concepts of the body in society It is easy to read and provides useful examples making it ideal for students across a range of social science disciplines Dr Sharron Hinchliff Sheffield University Cregan has achieved something distinct an account of the sociology of the body which incorporates both theory and empirical studies which demonstrates excellent coverage of an ever expanding field and which is written in an accessible style An intelligent treatment and account of the sociology of the body which I look forward to incorporating into my teaching Dr Rob Meadows University of Surrey This book is a great idea It provides a thorough accessible and interesting introduction to the most important concepts in the sociology of the body Students new to this area will find it invaluable Professor Deborah Lupton University of Sydney This book provides a clear focused road map to the study of the body in society It defines explains and applies core topics relating to the human body demonstrating how we approach it as a social phenomenon Each concept Includes an easy to understand definition Provides real world examples Gives suggestions for further reading Is carefully cross referenced to other related concepts Written to meet the needs of the modern student this book offers the basic materials tools and guidance needed study and write about the body

Sociology ,2000 **Genetic Governance** Robin Bunton,Alan Petersen,2005-03-18 Ethical and practical issues around genetic research are of major international concern both in academia and in the public domain Questions concerning what interventions are possible and appropriate with the increasing amount of genetic information available challenge our understandings of ourselves our health and wellbeing and the role of medical ethics public health surveillance and risk However there has been little reflection on the socio political effects of this new genetic knowledge and the changes in practice that are currently impacting on our lives Containing

contributions from key international researchers this book examines the broader issues of genetic debates and looks at how prediction and risk assessment is being changed in the arenas of health medicine and reproduction bringing new insight on the dangers of surveillance regulation and increased inequality Developed out of the Taylor and Francis journal Critical Public Health the book considers the implications of developments in genetics for contemporary liberal governance as well as for the future of healthcare and public health *Perfecting Pregnancy* Isabel Karpin, Kristin Savell, 2012-03-30 Examines the legislative oversight in the regulation of prenatal and preimplantation testing technologies across a number of jurisdictions

Encyclopedia of Genetics Bryan D. Ness, 2004 An encyclopedia of genetics **Social Sciences Index**, 2000

Gendered Bodies Judith Lorber, Lisa Jean Moore, 2007 For centuries the biological sciences have dissected measured and probed the human body as a product of nature But from a feminist perspective the human body is a social production Human bodies are shaped and controlled by the norms and expectations of gendered social orders intersected by racial class religious and age norms and expectations The result is a gendered body produced for a gendered social world In this concise text with readings designed for undergraduate students Lorber and Moore present feminist contributions to social and cultural studies of the human body showing the construction of gendered bodies in different contexts The authors argue that the ideology of the perfect body is a powerful means of social control for girls and boys as well as women and men The authors show how children's bodies are gendered through games and sports and shaped and modified throughout adulthood to meet social expectations Each chapter includes a list of key concepts three readings recommended books and articles and Internet sources For the instructor the book includes class exercises and a list of films with somatic themes *Health, Technology and Society* Andrew Webster, 2007-09-11 The impact of technology on health service is an issue of global concern and this pertinent text provides a fascinating account of current health care technologies and their implications for health providers and users **The Policies of Reproduction at the Turn of the 21st Century** Maria Mesner, Gudrun Wolfgruber, 2007 This pathbreaking volume on gender studies contains contributions from 15 international scholars in six countries on the topic of reproduction policies It combines an analysis of child care policies with one of procreative policies for each country From various fields of study around the world the contributors present new research from many perspectives However the combination of two research perspectives provides innovative insights into the relationship between family gender and population policies Apart from the emphasis on single countries the book also provides general conclusions on politics medical science and society on the still controversial topic of reproduction policies [The Blackwell Encyclopedia of Sociology: C](#) George Ritzer, 2007 **Social Theory and Human Biotechnology** Tim Owen, 2009 The book is intended as a contribution towards metatheoretical development as part of the post postmodern return to sociological theory associated with Robert Sibeon 1996 1999 2004 2007 Derek Layder 1997 2004 2007 Nicos Mouzelis 1991 1993 1995 2007 Margaret Archer 1995 1998 and Owen 2006a 2006b 2007a 2007b in tandem with a study of some of the sociological

and ethical implications of selected examples of human biotechnology The examples include the Human Genome Project and related areas of interest such as reproductive biotechnology the attempts to develop a biological sociology by writers of the embodied school and what Powell and Owen 2005 term the biomedical model The book is also intended to contribute towards building bridges between post modern metatheory and biological science *Young Women in Post-Yugoslav Societies* Mirjana Adamović,2014 *Sociological Abstracts* Leo P. Chall,2003 CSA Sociological Abstracts abstracts and indexes the international literature in sociology and related disciplines in the social and behavioral sciences The database provides abstracts of journal articles and citations to book reviews drawn from over 1 800 serials publications and also provides abstracts of books book chapters dissertations and conference papers Neither Villain Nor Victim Tammy L. Anderson,2008 Female drug addicts are often stereotyped either as promiscuous lazy and selfish or as weak scared and trapped into addiction These depictions typify the pathology and powerlessness narrative that has historically characterized popular and academic conversations about female substance abusers Neither Villain Nor Victim attempts to correct these polarizing perspectives by presenting a critical feminist analysis of the drug world By shifting the discussion to one centered on women s agency and empowerment this book reveals the complex experiences and social relationships of women addicts Essays explore a range of topics including the many ways that women negotiate the illicit drug world how former drug addicts manage the more intimate aspects of their lives as they try to achieve abstinence how women tend to use intervention resources more positively than their male counterparts and how society can improve its response to female substance abusers by moving away from social controls such as the criminalization of prostitution and rehabilitative programs that have been shown to fail women in the long term Advancing important new perspectives about the position of women in the drug world this book is essential reading in courses on women and crime feminist theory and criminal justice New Literature on Women ,2000 **The Evolution of Alienation** Lauren Langman,Devorah Kalekin-Fishman,2006 Building on the Marxian view of alienation as the inevitable consequence of wage labor that divests human beings of control over their life forces The Evolution of Alienation provides new insights into contemporary conditions Contributors explore how alienation is fostered not only by television freak shows and shock music but also by programmed schooling and even by some scientific theories Others show that the contradictory relationships possible in some domains among them new technologies and domestic work disclose niches of fulfillment that belie alienation Humankind Evolving A. Roberto Frisancho,2006 **Ethnicity and Screening for Sickle Cell/thalassaemia** Simon Dyson,2005 Screening policies for sickle cell and thalassaemia have only recently been formalized in the UK This book asks what types of ethnicity information are relevant for health professionals to ask as part of this screening and why Through extensive use of interview material the book draws upon the experiences of sickle cell and thalassaemia counsellors who have been at the forefront of understanding in this area The book Demonstrates how best practice for screening in a multi ethnic society requires us to better understand

the myth of races the meanings of concepts such as ethnicity and racialization and the relation of racism to issues of citizenship immigration asylum and nationality Shows how learning from best practice for screening could be a model for developing cultural competency across all types of health care provision Clarifies through the use of the biologically grounded exemplar of sickle cell and thalassaemia debates of race and ethnicity for those working in social sciences Listens to the voices of experience and validates the hitherto unacknowledged achievements of professional women from minoritized ethnic groups Extensive direct quotations from experienced sickle cell and thalassemia counsellors Explanations of key concepts such as race ethnicity and racism Explanation of the political social and historical factors underlying tensions in asking an ethnicity questions Further resources and website information

Sociology of Health in New Zealand Kevin Dew, Allison Kirkman, 2002 This book firmly grounds sociological analysis of health in the New Zealand experience and takes in a wide range of contemporary themes in sociology of health and medicine The book is an easily readable textbook on the sociology of health
