

PLENTHY OF NOTHING

*The Downsizing of
the American
Dream and the
Case for Structural
Keynesianism*

THOMAS I. PALLEY

Plenty Of Nothing The Downsizing O

Brendan G. Carr

Plenty Of Nothing The Downsizing O:

The Little Big Number Dirk Philipsen, 2015-05-26 In one lifetime GDP or Gross Domestic Product has ballooned from a narrow economic tool into a global article of faith It is our universal yardstick of progress As The Little Big Number demonstrates this spells trouble While economies and cultures measure their performance by it GDP ignores central facts such as quality costs or purpose It only measures output more cars more accidents more lawyers more trials more extraction more pollution all count as success Sustainability and quality of life are overlooked Losses don't count GDP promotes a form of stupid growth and ignores real development How and why did we get to this point Dirk Philipsen uncovers a submerged history dating back to the 1600s climaxing with the Great Depression and World War II when the first version of GDP arrived at the forefront of politics Transcending ideologies and national differences GDP was subsequently transformed from a narrow metric to the purpose of economic activity Today increasing GDP is the highest goal of politics In accessible and compelling prose Philipsen shows how it affects all of us But the world can no longer afford GDP rule A finite planet cannot sustain blind and indefinite expansion If we consider future generations equal to our own replacing the GDP regime is the ethical imperative of our times More is not better As Philipsen demonstrates the history of GDP reveals unique opportunities to fashion smarter goals and measures The Little Big Number explores a possible roadmap for a future that advances quality of life rather than indiscriminate growth *Is There Hope for Uncle Sam?* Jan Nederveen Pieterse, 2009-02-28 For over a century now America has dominated global politics and the global imagination Yet as the dollar declines inequality increases rates of consumption are unprecedented and American unilateralism comes under fire such hegemony is increasingly unsustainable In this provocative new book leading sociologist Jan Nederveen Pieterse asks whether it's possible for America to chart a different course Nederveen Pieterse argues that correcting the course of decline would mean taking drastic steps Only a reinvention of New Deal politics could address social inequality whilst repositioning itself in world politics would mean adopting genuine multilateralism In the current American bubble however political and corporate unaccountability are so entrenched and the constants of policy support for Wall Street the Pentagon and Israel are so widely accepted by powerful elites that change is unlikely to come from within Is there Hope for Uncle Sam is a clear and provocative look at one of the big questions facing us in this century *Journal of Economic Literature*, 1999 Globalisation Great Britain: Parliament: House of Commons: Treasury Committee, 2007-10-16 Globalisation is having an enormous impact on the UK's economy creating significant challenges for policy making with the shift in economic power from West to East particularly the rise of China and India in the global economy The effects will be on felt on highly skilled jobs as well as some less skilled employment and public policy needs to respond to the likely implications for the labour market The Committee's report considers domestic policy challenges relating to the promotion of innovation and improving the business environment and the skills base in the economy and issues discussed include the drivers of globalisation trade and protectionism global

imbalances as well as the beneficial and adverse effects of globalisation for the UK economy The Committee recommends that in order to promote understanding of the impact of globalisation on jobs and communities the Government should publish an annual review of new developments affecting the impact of and prospects for globalisation Given that protectionist sentiment is increasing posing a threat to the progress of both developed and developing countries the Committee supports the Government's promotion of a successful conclusion to the Doha trade round Globalisation is also threatened by the risk of a disorderly unwinding of global imbalances and the success of a reformed International Monetary Fund will be judged by its performance in ensuring global imbalances are properly addressed

Commonwealth and Covenant Marcia Pally,2016-03-02 In *Commonwealth and Covenant* Marcia Pally argues that in order to address current socioeconomic problems we need not more economic formulas but rather a better understanding of how the world is set up an ontology of how we and the world work Without this good proposals that arise lack political will and go unimplemented Pally describes our basic setup as separability amid situatedness or distinction amid relation Though we are all unique individuals we become our singular selves through our relations and responsibilities to the people and environments around us Pally argues that our culture's overemphasis on separability individualism run amok results in greed adversarial and deceitful political discourse and chicanery resource grabbing broken relationships and anomie Maintaining that separability and situatedness can and must be considered together in public policy Pally draws on intellectual history philosophy and especially historic Christian and Jewish theologies of relationality to construct a new framework for addressing present economic and political ills [Business Ethics](#) ,1998 [Choice's Outstanding Academic Titles, 1998-2002](#) Rebecca Ann Bartlett,2003
