Which Proximity in Design Education? Rita Assoreira Almendra, 2025-01-30 This book explores various pedagogical viewpoints and dialectical positions within the field of design education and the concept of proximity it has established with industries and manufacturing. Which Proximity in Design Education frames a wide range of approaches in design studios on undergraduate, graduate, and postgraduate levels and their capacity to render meaningful and novel attitudes and actions beyond the classroom. The urgent call for resilience in the way we lead our lives has brought our global boundaries and social tensions to the forefront of the conversation, and there is a generation of students fully aware of our collective responsibility in this decisive decade. As such, educators need to rapidly adapt to new tools and ways of teaching design whilst also being challenged on how to educate the designer for the pressing tasks of the near future. It presents optimistic solutions for how education can support renovated mindsets and efforts towards common goals. This book contains distinct visions of the world and its problems relating to proximity in design education. As such, the chapters present diversified solutions to these issues which will be of interest to teachers and researchers working in design education.

Chapter authors challenge hegemonic cultural and linguistic norms, quantitative and static views of resources, the impact of U.S. education policy, and the limited attention to the agency, identities, and strategic actions of diverse students and their families.
