Sarah Sharples

Religious Behaviour:

The Psychology of Religious Behaviour, Belief and Experience Benjamin Beit-Hallahmi, Michael Argyle, 1997 Because society is increasingly secular it may seem irrelevant to consider the psychology of religion But the diversity of our multi ethnic and multi cultural society in fact makes religion more important to the social sciences than it has ever been before What are the social consequences of religion Every day the news is full of events that can be blamed on religion perpetrated by a range of groups from whole societies to individuals Beit Hallami and Argyle are renowned for their clear analytical approach to topics and this new state of the art study of psychology and religion is no exception It will be welcomed as an update to their previous work in the area by social psychologists sociologists and theologians worldwide

Feierman, 2009-06-08 Offers a fresh and detailed take on the evolution of religious behavior from a biobehavioral perspective promoting a new understanding that may help build bridges across the religious divide There has been much recent interest in the study of religion from the perspective of Darwinian evolution *The Biology of Religious Behavior The Evolutionary Origins of Faith and Religion* offers a broad overview of the topic written by internationally recognized experts In addition to its primary focus on religious behavior the book addresses other important aspects of religion such as values beliefs and emotions as they affect behavior The contributors approach the evolution of religion by examining the behavior of individuals in their everyday lives After describing various religious behaviors the contributors consider the behaviors with reference to their evolutionary history development during the lifetime of the individual proximate causes and adaptive value Happily this foray into understanding religion from a biobehavioral perspective demonstrates that at the biological and behavioral levels what unites the different religions of the world is far greater than what divides them **Religious Experience** Kenneth Edward, 1926 **Recent Religious Psychology** Albert Rudolph Uren, 1928 **The Meme Machine** Susan J. important discoveries about the nature of the inner self Confronting the deepest questions about our inner selves with all our emotions memories beliefs and decisions Susan Blackmore makes a compelling case for the theory that the inner self is merely an illusion created by the memes for the sake of replication *From Belief To Behaviour* Waltraud McGavock,2021-07-03 Our experiences environment and even genetics form our beliefs and attitudes In turn these beliefs influence our behavior and determine our actions Beliefs that are widely accepted become part of our culture and in many ways shape the society we live in Religion is probably the strongest belief system that has existed for thousands of years In many ways it is a code of conduct a rule book that allows believers to function in a non primitive or cultured manner This is a conversation on the letter Paul wrote to the Ephesians Paul wrote to expand the horizons of his readers His teaching shows us how to repair what has been broken by corruption in our lives damaging our behavior Paul s letter to the Ephesians shows us how to live out the purposes of God in the practical life of a believer The purpose of this book is to help the individual parts of the Body of Christ learn to knit Christian beliefs with Christian behavior *The Psychology of Religion* William Boothby Selbie,1926 *Why Religion* Horace Meyer Kallen,1927 **Constructing the Divine** G. asceticism and rituals that harm the performer Such behaviours are found in widely different cultures How is this possible This book shows that these behaviours as is religion in general are by products of features of the human mind whose evolutionary fitness is beyond doubt and explores those features Which are those features This book proposes a twofold answer It draws attention to the layered nature of human consciousness in which different manners of experience are superimposed on each other This goes a long way toward accounting for the universal religious belief in some kind of transcendental world a higher reality different from ordinary reality The layering of consciousness comes about in childhood and gains in prominence with the acquisition of a first language which is the second feature highlighted in this book Together these features explain a variety of normal religious behaviours and beliefs and account for the possibility of mystical experience They also explain the occurrence of behaviours that do not augment evolutionary fitness Biblico-theological
