*Cooperation, Religious Freedom, and the Liberal State* Brian Jeffrey Hutter, 2018 Religious freedom is often listed among the core freedoms that characterize the liberal state along with freedom of speech freedom of association and freedom of the person But it may seem that what is valuable about religion from a liberal point of view would

be sufficiently protected by these other core freedoms Does religious freedom have a special role to play in a liberal state Traditionally liberal theorists have thought that religious freedom required maintaining separation between the state and religion But problems arise when separation is applied strictly to every type of religion state interaction without attention to the underlying values at stake This dissertation defends a conception of religious freedom that makes room for cooperation and compromise with the aim of creating mutually beneficial relationships between religion and the state Separation is an important component of this picture but not its guiding principle This dissertation discusses two areas in which strict adherence to religion state separation may lead to problematic outcomes First strict adherence to separation lends support to an all or nothing approach to religious accommodation But compromise can often be more valuable for both religious persons and the state especially when the meaning or purpose of the religious activity is consistent with the purpose of the conflicting law In such cases compromise may generate creative solutions to conflicts and may promote mutual understanding and respect between religious persons and their fellow citizens This compromise based approach to accommodation is limited however by the principle that accommodation should not be used as a form of political protest Second strict adherence to separation supports protecting the autonomy of religious institutions to oversee their internal own affairs But the state must also protect the rights and interests of the members of religious institutions As such the state must ensure that religious institutions are voluntarily associations whose members have both a right and a genuine opportunity to exit the association As one example the state should generally not enforce religious arbitration agreements against members of religious institutions even when they have voluntarily agreed to them

**Religion in a Liberal State** Gavin D'Costa  
Malcolm Evans Tariq Modood and Julian Rivers, **Religious Freedom and Religious Pluralism in Africa** Pieter Coertzen, M Christian Green, Len Hansen, 2016-05-22 Africa continues to be a region with strong commitments to religious freedom and religious pluralism These however are rarely mere facts on the ground they are legal political social and theological projects that require considerable effort to realise This volume compiling the proceedings of the third annual conference of the African Consortium for Law and Religion Studies focuses on various issues which vastly effect the understanding of religious pluralism in Africa These include amongst others religious freedom as a human right the importance of managing religious pluralism and the permissibility of religious practice and observance in South African public schools

Should a Liberal State Ban the Burqa? Brandon Robshaw, 2020-05-14 Debates about whether the Wahhabist practice of face veiling for women should be banned in modern liberal states tend to generate more heat than light This book brings clarity to what can be a confusing subject by disentangling the different strands of the problem and breaking through the accusations of misogyny and Islamophobia Explaining and expounding the ideas of giants of the liberal tradition including Locke Mill and Rawls as well as contemporary thinkers like Nussbaum Kymlicka and Oshana the book considers a variety of conceptions of liberalism and how they affect the response to the question Directly addressing issues

facing many of today's societies it unpicks whether paternalism on grounds of welfare can be justified within liberalism the value of personal autonomy and the problem of whether a socially influenced choice counts as a genuine preference Covering the role of multiculturalism gender issues and feminism this comprehensive philosophical study of a major political question gets to the heart of whether a ban could be justified in principle and also questions whether any such ban could prove efficacious in achieving its end

**Liberal Neutrality and State Support for Religion** Leni Franken, 2016-05-18 This book focuses on the financing of religions examining some European church state models using a philosophical methodology The work defends autonomy based liberalism and elaborates how this liberalism can meet the requirements of liberal neutrality The chapters also explore religious education and the financing of institutionalized religion This volume collates the work of top scholars in the field Starting from the idea that autonomy based liberalism is an adequate framework for the requirement of liberal neutrality the author elaborates why a liberal state can support religions and how she should do this without violating the principle of neutrality Taking into account the principle of religious freedom and the separation of church and state this work explores which criteria the state should take into account when she actively supports religions faith based schools and religious education A number of concrete church state models including hands off religious accommodation and the state church are evaluated and the book gives some recommendations in order to optimize those church state models where needed Practitioners and scholars of politics law philosophy and education especially religious education will find this work of particular interest as it has useful guidelines on policies and practices as well as studies of church state models
