Pataphysics The Poetics Of An Imaginary Science:

'Pataphysics Christian Bok,2002 Christian Bok is a Social Sciences and Humanities Research Council Fellow affiliated with the Poetics Program at SUNY Buffalo Bok is the author of Crystallography Book I of Information Theory a nominee for the Gerald Lampert Memorial Award given for best poetic debut He has published numerous articles on Canadian avant garde poetry in Open Letter Canadian Literature and Studies in Canadian Literature and his own experimental poetry has been frequently anthologized appearing most recently in Imagining Language *Pataphysics, the Poetics of an Imaginary Science* ,1998 Poetics of Liveliness Ada Smailbegović,2021-10-29 Can poetry act as an aesthetic amplification device akin to a microscope through which we can sense minute or nearly imperceptible phenomena such as the folding of molecules into their three dimensional shapes the transformations that make up the life cycle of a silkworm or the vaporous movements that constitute the ever shifting edges of clouds We tend to think of these subjects as reserved for science but as Ada Smailbegović argues twentieth and twenty first century writers have intermingled scientific methodologies with poetic form to reveal unfolding processes of change Their works can be envisioned as laboratories within which the methodologies of experimentation natural historical description and taxonomic classification allow poetic language to register the rhythms and durations of material transformation Poetics of Liveliness moves across scales to explore the realms of molecules fibers tissues and clouds It investigates works such as Christian Bok's insertion of a poetic text into the DNA code of living bacteria in order to generate a new poem in the shape of a protein molecule Jen Bervin's considerations of silk fibers and their use in biomedicine Gertrude Stein's examination of brain tissues in medical school and its subsequent influence on her literary taxonomies of character and Lisa Robertson's studies of nineteenth century meteorology and the soft architecture of clouds In their attempt to understand physical processes unfolding within lively material worlds Smailbegović contends these poets have developed a distinctive materialist poetics Structured as a poetic cosmology akin to Lucretius's *On the Nature of Things* which begins at the atomic level and expands out to the vastness of the universe Poetics of Liveliness provides an innovative and surprising vision of the relationship between science and poetry **'Pataphysics Unrolled** Katie L. Price,Michael R. Taylor,2022-04-12 In the 1890s French poet and playwright Alfred Jarry founded pataphysics the absurdist science of imaginary solutions a concept that has been nominally recognized as the precursor to Dadaism Surrealism and the Theater of the Absurd among other movements Over a century after Jarry made the gesture of dying Katie L Price and Michael R Taylor argue that it is time to take the comedic intervention of pataphysics seriously Pataphysics Unrolled collects critical and creative essays to create an unauthorized account of pataphysical experimentation from its origins in the late nineteenth century through the contemporary moment Reaching beyond the geographic and cultural boundaries normally associated with pataphysics this volume presents rich readings of pataphysical syzygy traces the influence of pataphysics across disciplines and outside of coteries such as the Collège de Pataphysique and asks fundamental questions about the field of

modern and contemporary studies that challenge distinctions between the modern and the postmodern high and low culture the serious and the comic Touching on disciplines such as literature art architecture education music and technology this book reveals how pataphysics has been a platform and medium for persistent intellectual poetic conceptual and artistic experimentation for over a century In addition to the editors the contributors to this volume include Charles Bernstein Marc D cimo Adam Dickinson Johanna Drucker Craig Dworkin Catherine Hansen James Hendler John Heon Ted Hiebert Andrew Hugill Steve McCaffery Seth McDowell Jerome McGann Anne M Mulhall Marcus O Dair Jean Michel Rabat Orchid Tierney and Brandon Walsh

The Oxford Handbook of Ecocriticism Greg Garrard,2014 The Oxford Handbook of Ecocriticism provides a broad survey of the longstanding relationship between literature and the environment The moment for such an offering is opportune in many respects multiple environmental crises are increasingly inescapable at both transnational and local levels the role of the humanities in addition to technology and politics is increasingly recognized as central for exploring and finding solutions and the subject of ecocriticism has reached a kind of critical mass both within its Anglo American heartlands and beyond From its origins in the study of American Nature Writing and British Romanticism ecocriticism has developed along numerous theoretical historical cultural and geographical axes the most contemporary and exciting of which will be represented in the Handbook The contributors include eminent founders of the field including Cheryll Glotfelty and Jonathan Bate a number of key second wave ecocritics and the best up and coming scholars Topics covered include Green Shakespeare the Bard s subversive uses of the pastoral John Clare s sacred relationship with the land Thoreau s profound political passion the natural landscape as symbol of postcolonial resistance in works by Lessing Naipaul and Coetzee the relation between feminism and environmentalism language and the concept of biosemiotics and concerns over pollution and toxicity in films like Erin Brockovitch Michael Clayton and Al Gore s An Inconvenient Truth

Notational Experiments in North American Long Poems, 1961-2011 A. J. Carruthers,2017-01-28 This book is a critical experiment that tracks the literary and poetic uses of musical notation and notational methods in North American long poems from the middle of last century to the contemporary moment Poets have readily referred to their poems as scores Yet in this study Carruthers argues that the integration of musical scores in expansive works of this period does more work than previously thought offering both resolution and escape from the demands placed on long poem form The five case studies on Langston Hughes Armand Schwerner BpNichol Joan Retallack and Anne Waldman offer approaches to reading literary scores in what might be described as a critical stave or a critical fugue of instances In differing ways musical notation and notational methods impact the form time and sometimes the ethical and political stances of these respective long poems

Avant Canada Gregory Betts,Christian Bök,2019-01-10 Avant Canada presents a rich collection of original essays and creative works on a representative array of avant garde literary movements in Canada from the past fifty years From the work of Leonard Cohen and bpNichol to that of Jordan Abel and Liz Howard Avant Canada features twenty eight of the best writers and critics in the

field The book proposes four dominant modes of avant garde production Concrete Poetics which accentuates the visual and material aspects of language Language Writing which challenges the interconnection between words and things Identity Writing which interrogates the self and its sociopolitical position and Copyleft Poetics which undermines our habitual assumptions about the ownership of expression A fifth section commemorates the importance of the Centennial in the 1960s at a time when avant garde cultures in Canada began to emerge Readers of this book will become familiar with some of the most challenging works of literature and their creators that this country has ever produced From Concrete Poetry in the 1960s through to Indigenous Literature in the 2010s Avant Canada offers the most sweeping study of the literary avant garde in Canada to date **Xcp**, 2004 On Literature and Science Philip Coleman, 2007 On literature and science explores some of the ways that writers have engaged with science and technology from the early medieval period to the present Contents include Helen Conrad O Briain TCD Chaucer technology and the rise of science fiction in English John Scattergood TCD Horology and literature in Renaissance England Amanda Piesse TCD Bodies of knowledge and knowledge of the body in 16th century literature Andrew J Power TCD Mental health and Hamlet Stephen Matterson TCD Edgar Allan Poe and the orangutan Darryl Jones TCD H G Wells and the imagination of disaster Ross Skelton TCD Biologic strands in the poems of Louis MacNeice Philip Coleman TCD Scientific research in recent American fiction Peter Middleton U Southampton Can poetry be scientific Iggy McGovern TCD Science and poetry and also creative writings by Randolph Healy Meredith Quartermain Harry Clifton Allen Fisher Maurice Scully Dylan Harris and Kit Fryatt The Griffin Poetry Prize Anthology Esta Spalding, 2002 The second volume of The Griffin Poetry Prize Anthology includes selections from the international and Canadian books shortlisted for the 2002 prize chosen and introduced by jurors Dionne Brand Robert Creeley and Michael Hofmann Edited by award winning poet Esta Spalding this book is a one stop shop for poems from each of the seven shortlisted collections Canadian Prize winner Eunoia by Christian B k Coach House Sheep s Vigil by a Fervent Person by Eirin Moure Anansi Short Haul Engine by Karen Solie Brick Maraca New and Selected Poems 1965 2000 by Victor Hernandez Cruz Coffee House Homer War Music by Christopher Logue Faber Conscious and Verbal by Les Murray FSG and International Prize winner Disobedience by Alice Notley Penguin Royalties generated from The Griffin Poetry Prize Anthology are donated to UNESCO s World Poetry Day **The New Structuralism** Rivka Oxman, Robert Oxman, 2010-08-23 Today the convergence of design engineering and architectural technologies is breeding a new material practice in experimental architecture The significant emphasis on the structuring logic of tectonics is resulting in a new structuralism in design In this pioneering publication this important shift is fully defined as a highly dynamic synthesis of emerging principles of spatial structural and material ordering integrated through the application of materialisation and fabrication technologies Providing the foundations for a new theory of structuring in architecture the new structuralism has broad implications for the way we both conceive and undertake architectural design as its impact starts to emanate not only across education internationally

but also through architectural research and practice Features premier research and design oriented engineering practices Bollinger Grohmann Buro Happold Hanif Kara AKT Werner Sobek Focuses on design and fabrication technologies in the recent work of Martin Bechthold Barkow Leibinger EMBT Enric Miralles Benedetta Tagliabue Gramazio Kohler Fabian Scheurer designtoproduction Yves Weinand and Markus Hudert Contributors include John Chilton Dominik Holzer and Steven Downing Neri Oxman Helmut Pottmann Nina Rappaport *William Anastasi's Pataphysical Society* William Anastasi,2005 **Rain Taxi Review of Books** ,2000 *Open Letter* ,2008 *Pataphysical Discourses in the German Bildungsroman* Christian Sean Anderson,2010 **Wonder Texts and Wonder Chambers** Jerónimo Arellano,2008 **Are the Humanities Inconsequent?** Jerome J. McGann,2009 Adapting the discontinuous and multi tonal critical procedures of works like Carlyle s Sartor Resartus and Laura Riding s Anarchism Is Not Enough Jerome McGann subjects current literary studies to a patacritical investigation The investigation centers in the interpretation of a notorious modern riddle Outside of a dog a book is a man s best friend Inside of a dog it s too dark to read Working by indirection and from multiple points of view the book argues that aesthetics is always a science of exceptions and that any given critical practice is also always an exception from itself The book works from two assumptions first that the riddle of the dog conceals an allegory about book culture and is addressed to the academic custodians of book culture and second that any explanation of the riddle is necessarily implicated in the problem posed by the riddle It therefore remains to be seen it is the reader s part to decide whether the book is a friend to man or perhaps like the riddle of the dog too dark to read **Nanoculture** N. Katherine Hayles,2004 Nano denotes a billionth a nanometer is a billionth of a meter New instrumentation and techniques have for the first time made possible materials research and engineering at this level the scale of individual molecules and atoms Extraordinary visions of material abundance unprecedented materials and powerful engineering capabilities have marked the arrival of nanotechnology as well as dystopian scenarios of self replicating devices running amok and causing global catastrophe Largely a future possibility rather than present actuality nanotechnology has become a potent cultural signifier NanoCulture explores the ways in which nanotechnology interacts with and itself becomes a cultural construction Topics include the co construction of nanoscience and science fiction the influence of risk assessment and nanotechnology on the shapes of narratives intersections between nanoscience as a writing practice and experimental literature at the limits of fabrication the Alice in Wonderland metaphor for nanotechnology and the effects of mediation on nanotechnology and electronic literature NanoCulture is produced in collaboration with the nano art exhibit at the Los Angeles County Museum of Art December 2003 September 2004 created by an interdisciplinary team led by media artist Victoria Vesna and nanoscientist James Gimzewski NanoCulture is richly illustrated with images from the nano exhibit which also provides the basis for an ethnographic analysis of collaborative process and an exploration of changing concepts of museum space The dynamic uniting these diverse perspectives is boundary crossing between art science and literature cultural imaginaries
