Portraits Of Thought Knowledge Methods And Styles In Pascal:

Portraits of Thought Buford Norman, 1988 Pascal's God and the Fragments of the World Martin Nemoianu, 2024-04-30
In Pascal's God and the Fragments of the World Martin Nemoianu offers a new interpretation of the thought of Blaise Pascal drawn from the Pensées and beyond. The book takes Pascal's central theme to be the distinction Infini rien between the transcendent God and the created world which without God would be nothing. Nemoianu identifies the distinction in Pascal articulates it and works through the difficulties attending the distinction's disclosure. He then considers the implications of the distinction for the nature of nature and the nature of the human being culminating in the ideal of martyrdom. The book closes with treatment of a closely related theme the relation between human freedom and divine grace in the context of the vexed question of Pascal's Jansenism. *Blaise Pascal* D. Adamson, 1994-12-19 This chronological survey explores Pascal's 1623-62 achievement as mathematician, physicist, and religious thinker; it also has a chapter on his life. His work on conic sections, the probability calculus, number theory, cycloid curves, and hydrostatics is considered in detail. Analyses of the Provincial Letters and the Thoughts bring out the many distinctive features, thematic and technical, of each text. Pascal's lesser-known works are also studied. There is a chapter on the Wager argument. A wide-ranging bibliography completes the book. The European Philosophers from Descartes to Nietzsche Monroe Beardsley, 2002-11-12 Between the earliest and the latest of the works included here we have two hundred and fifty years of vigorous and adventurous philosophizing. Monroe Beardsley writes in his Introduction to this collection: "If the modern period can be only vaguely or arbitrarily bounded, it can at least be studied, and we can ask whether any dominant themes, overall patterns of movement, or notable achievements can be found within it." This question is one that is best asked by the reader after he has read or read around in these works. This Modern Library Paperback Classic also includes a newly updated Bibliography. **Encyclopedia of the Essay** Tracy Chevalier, 1997 A hefty one-volume reference addressing various facets of the essay. Entries are of five types: 1) considerations of different types of essay (e.g., moral, travel, autobiographical); 2) discussions of major national traditions; 3) biographical profiles of writers who have produced a significant body of work in the genre; 4) descriptions of periodicals important for their publication of essays; and 5) discussions of some especially significant single essays. Each entry includes citations for further reading and cross-references. Annotation copyrighted by Book News, Inc., Portland, OR. *The Oxford Companion to Christian Thought* Adrian Hastings, Alistair Mason, Hugh S. Pyper, 2000-12-21 Embracing the viewpoints of Catholic, Protestant, or Orthodox thinkers of conservatives, liberals, radicals, and agnostics, Christianity today is anything but monolithic or univocal. In *The Oxford Companion to Christian Thought*, general editor Adrian Hastings has tried to capture a sense of the great diversity of opinion that swirls about under the heading of Christian thought. Indeed, the 260 contributors who hail from twenty countries represent as wide a range of perspectives as possible. Here is a comprehensive and authoritative, though not dogmatic, overview of the full spectrum of Christian thinking. Within its 600 alphabetically arranged

entries readers will find lengthy survey articles on the history of Christian thought on national and regional traditions and on various denominations from Anglican to Unitarian There is ample coverage of Eastern thought as well examining the Christian tradition in China Japan India and Africa The contributors examine major theological topics such as resurrection the Eucharist and grace as well as controversial issues such as homosexuality and abortion In addition short entries illuminate symbols such as water and wine and there are many profiles of leading theologians of non Christians who have deeply influenced Christian thinking including Aristotle and Plato and of literary figures such as Dante Milton and Tolstoy Most articles end with a list of suggested readings and the book features a large number of cross references The Oxford Companion to Christian Thought is an indispensable guide to one of the central strands of Western culture An essential volume for all Christians it is a thoughtful gift for the holidays

Papers on French seventeenth century literature

,1993 **The Encyclopedia of Christian Literature** George Thomas Kurian,James D. Smith III,2010-04-16 The written word is one of the defining elements of Christian experience As vigorous in the 1st century as it is in the 21st Christian literature has had a significant function in history and teachers and students need to be reminded of this powerful literary legacy Covering 2 000 years The Encyclopedia of Christian Literature is the first encyclopedia devoted to Christian writers and books In addition to an overview of the Christian literature this two volume set also includes 40 essays on the principal genres of Christian literature and more than 400 bio bibliographical essays describing the principal writers and their works These essays examine the evolution of Christian thought as reflected in the literature of every age The companion volume also features bibliographies an index a timeline of Christian Literature and a list of the greatest Christian authors The encyclopedia will appeal not only to scholars and Christian evangelicals but students and teachers in seminaries and theological schools as well as to the growing body of Christian readers and bibliophiles The Classical Model Harriet Amy Stone,1996 Literature has its own strategies for ordering information In this elegant and insightful book about the formation of knowledge in seventeenth century France Harriet Stone asks what those strategies conveyed about the limits of science and about the cultural environment of the period A propensity for reason and control pervaded literature as well as science allowing classical literature to serve as a unique laboratory for exploring the model of representation developed by science Literary texts have influenced the establishment and transformation of the paradigms grounding knowledge by drawing attention to meanings that the paradigms fail to name Stone identifies not only the momentous achievement of the discovery of the scientific method but also the more subtle process of experimentation in literature through which ideas were continually tested and redefined She offers close readings of works by Rotrou Corneille Racine Moliere La Rochefoucauld and Lafayette as well as by Descartes Furetiere and Pascal Her first and last chapters frame the literary texts within a discussion of Foucault s analysis of classical science Classical writers began to encode their own world Once they did not only science but literature became an authority for mapping knowledge Notwithstanding the classical period s efforts to

affirm the unity of knowledge Stone concludes that knowledge was never complete or certain Literature s capacity to rework the model through which it assigns meanings proves essential to unfolding both the art and the science of representation

Pascalian Fictions Van Kelly,1992 Pascalian Fictions presents the thesis that in fragments 135 and 418 in Lafuma s edition and a fortiori throughout the *Pense es* we see a coherent dialectic with Descartes and Cartesian thought Kelly asserts that these two fragments contain a strident and active attempt on the part of Pascal to grapple with and subvert Descartes s ontological premises and to replace them with categories more germane to his system of Christian apologetics Kelly s work focuses via an innovative analysis of structure form and syntax on narrative fiction as a mode of discourse in the *Pense es* and particularly in the famous *pari* PFSC ,1990 **French Studies** ,1947 Proceedings and Addresses of the American Philosophical Association American Philosophical Association,1988 List of members in v 1 **Descartes and the Resilience of Rhetoric** Thomas M. Carr,1990 A careful analysis of the rhetorical thought of Ren Descartes and of a distinguished group of post Cartesians Covering a unique range of authors including Bernard Lamy and Nicolas Malebranche Carr attacks the idea which has become commonplace in contemporary criticism that the Cartesian system is incompatible with rhetoric Carr analyzes the writings of Balzac the Port Royalists Arnauld and Nicole Malebranche and Lamy exploring the evolution of Descartes thought into their different theories of rhetoric He constructs his arguments probing each author s writings on rhetoric persuasion and attention to demonstrate the basis for rhetorical thought present in Descartes theory of persuasion when it is combined with his psychophysiology of attention *The Biographical Dictionary of Scientists: Lebedev to Zworykin* Roy Porter,Marilyn Bailey Ogilvie,2000 Third Edition Vol 1 Abbe to Leavitt *Classics of Mathematics* Ronald Calinger,1995 Appropriate for undergraduate and select graduate courses in the history of mathematics and in the history of science This edited volume of readings contains more than 130 selections from eminent mathematicians from A h mose to Hilbert and Noether The chapter introductions comprise a concise history of mathematics based on critical textual analysis and the latest scholarship Each reading is preceded by a substantial biography of its author **South Atlantic Review** ,1991 The Biographical Dictionary of Scientists Roy Porter,Marilyn Bailey Ogilvie,2000 The third edition of this acclaimed reference work offers more than 1 280 concise authoritative portraits of the men and women of science throughout the ages Covering every field from astronomy to zoology the pure sciences as well as engineering and technology the new edition of the Dictionary features more than 80 new entries that add the richer representation of contemporary and women scientists such as Stanley Prusiner winner of the Nobel Prize for medicine and Sofia Kovalevskaya the Russian mathematician The biographies ranging in length from 500 to 1 200 words clearly present each scientist s contributions they also provide fascinating insights into the workings of scientific discovery and validation The Dictionary features 150 illustrations updated historical overviews of the major sciences chronologies quotations bibliographies tables of scientific discoveries and Nobel Prize winners and an enlarged glossary Praise for the first edition Excellent recommended Reference Books Bulletin
