Differential equations play a vital role in the fields of engineering and science Problems in engineering and science can be modeled using ordinary or partial differential equations Analytical solutions of differential equations may not be obtained easily so numerical methods have been developed to handle them Machine intelligence methods such as Artificial Neural Networks ANN are being used to solve differential equations and these methods are presented in Artificial Neural Networks for Engineers and Scientists Solving Ordinary Differential Equations This book shows how computation of differential equation becomes faster once the ANN model is properly developed and applied

Introduction to Simulink with Engineering Applications Steven T. Karris, 2006 This text is an introduction to Simulink a companion application to MATLAB It is written for students at the undergraduate and graduate programs as well as for the working professional Although some previous knowledge of MATLAB would be helpful it is not absolutely necessary Appendix A of this text is an Introduction to MATLAB to enable the reader to begin learning both MATLAB and Simulink to perform graphical computations and programming Chapters 2 through 18 describe the blocks of all Simulink libraries Their application is illustrated with practical examples through Simulink models some of which are supplemented with MATLAB functions

commands and statements Chapters 1 and 19 contain several Simulink models to illustrate various applied math and engineering applications Appendix B is an introduction to difference equations as they apply to discrete time systems and Appendix C introduces the reader to random generation procedures This text supplements our Numerical Analysis with MATLAB and Spreadsheet Applications ISBN 0 9709511 1 6 It is self contained the blocks of each library are described in an orderly fashion that is consistent with Simulink s documentation This arrangement provides insight into how a model is used and how its parts interact with each another Like MATLAB Simulink can be used with both linear and nonlinear systems which can be modeled in continuous time sample time or a hybrid of these Examples are provided in this text Most of the examples presented in this book can be implemented with the Student Versions of MATLAB and Simulink A few may require the full versions of these outstanding packages and can be skipped Some add ons known as Toolboxes and Blocksets can be obtained from The MathWorks Inc 3 Apple Hill Drive Natick MA 01760 2098 USA www mathworks com
