Practice Makes Practice:

Practice Makes Practice Deborah P. Britzman, 2012-02-16 This revised edition of the classic text explores the complexity of what learning to teach means. While the research on teacher education continues to proliferate, *Practice Makes Practice* remains the discipline's indispensable classic text. Drawing upon critical ethnography, this new edition of this best-selling book asks the question: what does learning to teach do and mean to newcomers and to those who surround them? Deborah P. Britzman writes poignantly of the struggle for significance and the contradictory realities of secondary teaching. She offers a theory of difficulty in learning and explores why the blaming of individuals is so prevalent in education. The completely revised introduction presents a refined and further developed theoretical framework and analysis, discussing why we might return to a study of teaching and learning. Also included in this updated edition is an insightful hidden chapter that comments on the methodology of the study and some of the dilemmas the author continues to face as her own thinking develops around the issues of representing teaching and learning for those just entering the profession. Deborah P. Britzman is Distinguished Research Professor at York University. She is the author of many books, including *The Very Thought of Education: Psychoanalysis and the Impossible Professions*, *After Education*, *Anna Freud*, *Melanie Klein*, and *Psychoanalytic Histories of Learning and Lost Subjects*. *Contested Objects: Toward a Psychoanalytic Inquiry of Learning* all published by SUNY Press.

Practice Makes Perfect Simon Horsey, 2011 As musicians we are always told that music practice is the key to success on any instrument, but nobody ever tells us how to practice. We are told that practice makes perfect, but nobody ever tells us how. In fact, practice doesn't make perfect. Perfect practice makes perfect. *Practice Makes Perfect* is a book that will revolutionize your practice. Learn how to practice more efficiently and effectively by applying the easy-to-use techniques in this book and start making more progress in less time, whatever instrument you play. More progress doesn't come from working harder; it comes from working smarter and knowing how to practice. *Motor Learning and Control for Dance* Donna Krasnow, Mary Virginia Wilmerding, 2015-06-22 As dance training evolves and becomes more complex, knowledge of motor behavior is foundational in helping dancers learn and master new skills and become more efficient in integrating the skills. *Motor Learning and Control for Dance* is the first resource to address motor learning theory from a dance perspective. Educators and students preparing to teach will learn practical ways to connect the science behind dance to pedagogy in order to prepare dancers for performance. Dancers interested in performance from the recreational to professional levels will learn ways to enhance their technical and artistic progress. In language accessible even to those with no science background, *Motor Learning and Control for Dance* showcases principles and practices for students, artists, and teachers. The text offers a perspective on movement education not found in traditional dance training, while adding to a palette of tools and strategies for improving dance instruction and performance. Aspiring dancers and instructors will explore how to develop motor skills, how to control movement on all levels, and most important, how motor skills are best taught and learned. The authors noted

Jerome C. Harste, Christine Leland, Kristina Schmidt, Vivian Vasquez, Anne Ociepka, 2002 One of the problems in re imagining the educology of teacher education lies in how we talk about theory and practice Often theory and practice are spoken about as if they are opposites of each other and sometimes they are in the sense that each has to compete with the other in terms of time Even when there is general agreement that both theory and practice are necessary someone will inevitably ask But really how important is theory What contribution to teacher preparation do field experiences make If forced by time constraints to make a choice how much of one or the other is enough Contains 8 figures Writing & Counting Numbers
