

Chord Charts

Major chords are formed from the first, third, and fifth tones of the major scale of the chord name. There are three left-hand positions for all major chords.

Major Chords G Tuning

The number beside each diagram indicates the fret number where the chord begins.

Major chords include the primary chords for songs played in major keys. (Most bluegrass songs fall into this category.) In addition, they can also be substituted for other chords in a song, either to fulfill the function of those chords, or to act as passing chord, or to add color.

Note: ♯ means to "sharp" or raise in pitch one fret. If a ♯ follows the letter name of a chord, the chord should be played one fret higher than the regular position. ♭ means to "flat" or lower in pitch one fret. If a ♭ follows the letter name of a chord, the chord should be played one fret lower than the regular position.
